LAMPIRAN

A. Daftar Checklist PRISMA Scoping Review

Table. PRISMA-ScR Checklist

Section	Item	PRISMA-ScR Checklist Item
Title	1	Identify the report as a scoping review.
Abstract		
Structured summary	2	Provide a structured summary that includes (as applicable) background, objectives, eligibility criteria, sources of evidence, charting methods, results, and conclusions that relate to the review questions and objectives.
Introduction		
Rationale	3	Describe the rationale for the review in the context of what is already known. Explain why the review questions/objectives lend themselves to a scoping review approach.
Objectives	4	Provide an explicit statement of the questions and objectives being addressed with reference to their key elements (e.g., population or participants, concepts, and context) or other relevant key elements used to conceptualize the review questions and/or objectives.
Methods		
Protocol and registration	5	Indicate whether a review protocol exists; state if and where it can be accessed (e.g., a Web address); and if available, provide registration information, including the registration number.
Eligibility criteria	6	Specify characteristics of the sources of evidence used as eligibility criteria (e.g., years considered, language, and publication status), and provide a rationale.
Information sources*	7	Describe all information sources in the search (e.g., databases with dates of coverage and contact with authors to identify additional sources), as well as the date the most recent search was executed.
Search	8	Present the full electronic search strategy for at least 1 database, including any limits used, such that it could be repeated.
Selection of sources of evidence†	9	State the process for selecting sources of evidence (i.e., screening and eligibility) included in the scoping review.
Data charting process‡	10	Describe the methods of charting data from the included sources of evidence (e.g., calibrated forms or forms that have been tested by the team before their use, and whether data charting was done independently or in duplicate) and any processes for obtaining and confirming data from investigators.
Data items	11	List and define all variables for which data were sought and any assumptions and simplifications made.
Critical appraisal of individual sources of evidence§	12	If done, provide a rationale for conducting a critical appraisal of included sources of evidence; describe the methods used and how this information was used in any data synthesis (if appropriate).
Summary measures	13	Not applicable for scoping reviews.
Synthesis of results	14	Describe the methods of handling and summarizing the data that were charted.
Risk of bias across studies	15	Not applicable for scoping reviews.
Additional analyses	16	Not applicable for scoping reviews.
Results		
Selection of sources of evidence	17	Give numbers of sources of evidence screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally using a flow diagram.
Characteristics of sources of evidence	18	For each source of evidence, present characteristics for which data were charted and provide the citations.
Critical appraisal within sources of evidence	19	If done, present data on critical appraisal of included sources of evidence (see item 12).
Results of individual sources of evidence	20	For each included source of evidence, present the relevant data that were charted that relate to the review questions and objectives.
Synthesis of results	21	Summarize and/or present the charting results as they relate to the review questions and objectives.
Risk of bias across studies	22	Not applicable for scoping reviews.
Additional analyses	23	Not applicable for scoping reviews.
Discussion		
Summary of evidence	24	Summarize the main results (including an overview of concepts, themes, and types of evidence available), link to the review questions and objectives, and consider the relevance to key groups.
Limitations	25	Discuss the limitations of the scoping review process.
Conclusions	26	Provide a general interpretation of the results with respect to the review questions and objectives, as well as potential implications and/or next steps.
Funding	27	Describe sources of funding for the included sources of evidence, as well as sources of funding for the scoping review. Describe the role of the funders of the scoping review.

B. Daftar Checklist Pengtinjauan Kualitas Scoping Review

Cooper et al.

| 3

Table 3. The Scoping Review Checklist.

Key criteria	Checklist Items	Score one point for each item
1. Study aim, purpose, and research question	1. The rationale/purpose for the scoping review was stated. 2. Appropriate scoping review methodology was used. 3. At least two reviewers conducted the review. 4. The research question/s was/were used to guide the scope of inquiry (participants, concept, and context included ^a).	
2. Relevant studies	5. An in-depth literature search was conducted to identify all relevant literature. ^b 6. A comprehensive list of relevant studies that balances breadth with feasibility was identified.	
3. Study selection	7. The inclusion and exclusion criteria were clearly described and were used to determine eligibility of studies. 8. The study selection involved an iterative process, including searching the literature, refining the search strategy, and reviewing articles for inclusion. 9. At least two reviewers independently reviewed the title and abstracts and reached consensus on studies for inclusion. 10. The study selection process was summarized in a flow chart.	
4. Charting the data	11. The research team collectively developed a data charting format and determined which variables to extract to answer the research question. 12. The data were charted through sifting and sorting; tables include study details based on full texts. 13. A numerical analysis of the extent and nature of included studies was reported. 14. The quality of papers was assessed. ^c	
5. Collating, summarizing, and reporting the results	15. Results were presented in a logical descriptive or diagrammatic or tabular format. 16. A narrative account of results was presented. 17. The results were aligned with the review aim, purpose/research question/s. 18. Issues associated with bias were discussed. 19. Implications for future research, education, practice, and/or policy were discussed. 20. The conclusion described the current state of the overall literature in relation to the topic.	
6. Optional stage: consultation	Stakeholder/participant voices were included in the review when appropriate. If included: 21. The process of stakeholder consultation was clearly described. 22. Findings were re-examined in the light of stakeholder input, to justify final conclusions.	
Total		22 points
Additional guidance	a. Item 4: Scoping reviews have a broad scope with even broader inclusion criteria, so participants may be selected from a wide group. The concept (area of interest/condition being explored, etc.) will also have a wide remit and the context may be left open, for example, any health care setting in any region. b. Item 5: This should include searches of an adequate number of different sources (databases/electronic sources, research registers; reference lists/hand searches, etc.). c. Item 14: Paper quality should also include a check to ensure that reports have not been retracted.	

C. Pencarian Artikel

1) Cochrane

The screenshot shows the Cochrane Library's Advanced Search results for a query related to heart failure and health coaching. The results are filtered by year (2020) and relevance. Two studies are listed:

Rank	Title	Details
1	A Trial to Reduce Readmissions Using Motivational Interviewing and Interactive Voice Response	NCT01855022 https://clinicaltrials.gov/show/NCT01855022, 2013 added to CENTRAL: 31 January 2020 2020 Issue 01 CT.gov
2	Effectiveness of Telephone-Based Health Coaching for Patients with Chronic Conditions: a Randomised Controlled Trial	

2) PubMed

The screenshot shows the PubMed Advanced Search Results page for a query related to heart failure and self-care management. The results are sorted by date, with the most recent search at the top. The search term used was "heart failure[MeSH Terms] OR (chronic heart failure[MeSH Terms]) OR (congestive heart failure[MeSH Terms]) AND (((health coaching[MeSH Terms]) OR (coaching[MeSH Terms])) OR (telephone coaching[MeSH Terms])) OR (telehealth coaching[MeSH Terms])) OR (motivational interviewing[MeSH Terms])) AND (((self care[MeSH Terms]) OR (self care management[MeSH Terms])) OR (self management[MeSH Terms]))".

Search ID	User Action	Search Query	Results	Last Run

3) Science Direct

The screenshot shows the ScienceDirect website interface. At the top, there's a navigation bar with links for 'e-resources perpustakaan nasional', 'Perpustakaan Nasional Republik Indonesia', 'Google Terjemahan', 'Sci-Hub', and 'WhatsApp'. Below the navigation bar is a search bar with the URL <https://e-resources.perpusnas.go.id/lib/37>. The main content area displays a search result for 361 articles. The search terms entered are 'heart failure AND health coaching OR ...'. Below the search bar, there are download and export options ('Download selected articles', 'Export') and a sorting option ('sorted by relevance | date'). On the left, there's a sidebar for 'Refine by' with a 'Years' section showing filters for 2020 (54), 2019 (40), 2018 (31), 2017 (28), 2016 (37), 2015 (33), and 2014 (27). The results list includes two entries:

- The effect of education through motivational interviewing compared with conventional education on self-care behaviors in heart failure patients with depression**
Patient Education and Counseling, August 2017, ...
First available on 27 February 2017
Ali Navidian, Hajar Mobaraki, Mansour Shakiba
Abstract Export
- Self-management support activities in primary care: A qualitative study to compare provision across common health problems**
Patient Education and Counseling, December 2020, ...
First available on 7 July 2020
Emma Harris, Caroline Barker, ... Felicity Astin

At the bottom of the page, there's a feedback link and a Windows taskbar with various application icons.

4) ProQuest

The screenshot shows the ProQuest search results page. The search term entered is 'heart failure AND health coaching OR motivational interviewing AND self care management'. The results count is 332. The interface includes a 'Basic Search' and 'Advanced Search' button, and tabs for 'Publications', 'Browse', and 'Databases (6)'. The search bar has a magnifying glass icon. Below the search bar, there are filter options for 'Applied filters' and 'Clear all filters', including 'Scholarly Journals' and 'Last 10 Years'. The results list shows two entries:

- Health coaching by telephony to support self-care in chronic diseases: clinical outcomes from The TERVA randomized controlled trial**
Patja, Kristina; Absetz, Pilvikki; Auvinen, Anssi; Tokola, Kari; Kyötiö, Janne; et al.
BMC Health Services Research, London Vol. 12, (2012): 147.
... self-care Pfizer Health Solutions has developed a tele-coaching...
... Motivational Interviewing in Health Care: Helping Patients Change Behavior The...
... management have been targeting single disease...
- Mindfulness and Motivational Interviewing: Two candidate methods for promoting self-management**
Benzo, Roberto P.Chronic Respiratory Disease, London Vol. 10, Iss. 3, (Aug 2013): 175-82.

At the bottom of the page, there's a Windows taskbar with various application icons.

5) Garuda

The screenshot shows the Garuda digital library search interface. The search bar at the top contains the query "health coaching". Below the search bar, there are three main search fields: "Search By" (set to "Title"), "Keywords" (containing "health coaching"), and "Publisher" (empty). A "Filter By Year" section shows a slider from 2014 to 2020, with the year 2020 selected. The search results page displays 7 documents found. The first result is titled "PENGARUH HEALTH COACHING BERBASIS TEORI HEALTH BELIEF MODEL TERHADAP TEKANAN DARAH PADA LANSIA DENGAN HIPERTENSI". It includes author information (Hastuti, Apriyani Puji; Mufarokhah, Hanin), journal details (Journal of Islamic Medicine Vol 3, No 2 (2019); Journal of Islamic Medicine), publisher information (Faculty of Medical and Health Sciences, Universitas Islam Negeri Maulana Malik Ibrahim), and download links. The second result is titled "HEALTH COACHING MENINGKATKAN SELF-EFFICACY KELUARGA DALAM MELAKUKAN PENCEGAHAN DEMAM BERDARAH DENGUE". The third result is titled "HEALTH COACHING BERBASIS HEALTH PROMOTION MODEL TERHADAP PENINGKATAN EFKASI DIRI DAN PERILAKU PENCEGAHAN PENULARAN PADA PASIEN TB PARU". At the bottom of the screen, a Windows taskbar is visible with various application icons.

The screenshot shows the Garuda digital library search interface. The search bar at the top contains the query "motivational interviewing". Below the search bar, there are three main search fields: "Search By" (set to "Title"), "Keywords" (containing "motivational interviewing"), and "Publisher" (empty). A "Filter By Year" section shows a slider from 2013 to 2020, with the year 2020 selected. The search results page displays 13 documents found. The first result is titled "THE EFFECT OF MOTIVATIONAL INTERVIEWING APPROACH ON MOTIVATION AND AUTONOMY OF TB PATIENT IN LUNG TB TREATMENT". It includes author information (Fembri, Pembronria Nona), journal details (Jurnal Ners Vol 8, No 2 (2013); Oktober 2013), publisher information (Universitas Airlangga), and download links. The second result is titled "Pengembangan Kompetensi Konselor Melalui Pelatihan Konseling Motivational Interviewing (Mi) Berbasis Local Wisdom Budaya Jawa". The third result is titled "Keefektifan Intervensi Psikologis: Motivational Interviewing Program untuk Meningkatkan Manajemen Diri dan Kontrol Glikemik pada Pasien Diabetes Mellitus Tipe 2". At the bottom of the screen, a Windows taskbar is visible with various application icons.
