JBI template source of evidence details, characteristics and results extraction instrument

Scoping Review Details	
Scoping Review title:	
Review objective/s:	
Review question/s:	
Inclusion/Exclusion Criteria	
Population	
Concept	
Context	
Types of evidence source	
Evidence source Details and Characteristics	
Citation details (e.g. author/s, date, title, journal, volume, issue, pages)	
Country	
Context	
Participants (details e.g. age/sex and number)	
Details/Results extracted from source of evidence (in relation to the concept of the scoping review)	
E.g. Quality of Life Domains assessed	
E.g. Number of items in tool	
E.g. details of psychometric validation of tool	

Lampiran 2:

Preferred Reporting Items for Systematic reviews and Meta-Analyses extension for Scoping Reviews (PRISMA-ScR) Checklist

SECTION	ITEM	PRISMA-ScR CHECKLIST ITEM	REPORTED ON PAGE #
TITLE			
Title	1	Identify the report as a scoping review.	Click here to enter text.
ABSTRACT			
Structured summary	2	Provide a structured summary that includes(as applicable): background, objectives, eligibility criteria, sources of evidence, charting methods, results, and conclusions that relate to the review questions and objectives.	Click here to enter text.
INTRODUCTION			
Rationale	3	Describe the rationale for the review in the context of what is already known. Explain why the review questions/objectives lend themselves to a scoping review approach. Provide an explicit statement of the questions and objectives being addressed with reference to their key elements (e.g., population or participants, concepts, and context) or other relevant key elements used to conceptualize the review questions and/or objectives.	Click here to enter text.
Objectives	4		Click here to enter text.
METHODS			
Protocol and registration	5	Indicate whether a review protocol exists; state if and where it can be accessed (e.g., a Web address); and if available, provide registration information, including the registration number. Specify characteristics of the sources of evidence used as eligibility criteria (e.g., years considered, language, and publication status), and provide a rationale.	Click here to enter text.
Eligibility criteria	6	Describe all information sources in the search (e.g., databases with dates of coverage and contact with authors to identify additional sources), as well as the date the most recent search was executed.	Click here to enter text.
Information sources*	7	Present the full electronic search strategy for at least 1 database, including any limits used, such that it could be repeated.	Click here to enter text.
Search	8	State the process for selecting sources of evidence (i.e., screening and eligibility) included in the scoping review.	Click here to enter text.
Selection of sources of evidence†	9	Describe the methods of charting data from the included sources of evidence (e.g., calibrated forms or forms that have been tested by the team before their use, and whether data charting was done independently or in duplicate) and any processes for obtaining and confirming data from investigators.	Click here to enter text.
Data charting process‡	10		Click here to enter text.

SECTION	ITEM	PRISMA-ScR CHECKLIST ITEM	REPORTED ON PAGE #
Data items	11	List and define all variables for which data were sought and any assumptions and simplifications made.	Click here to enter text.
Critical appraisal of individual sources of evidence§	12	If done, provide a rationale for conducting a critical appraisal of included sources of evidence; describe the methods used and how this information was used in any data synthesis (if appropriate).	Click here to enter text.
Synthesis of results	13	Describe the methods of handling and summarizing the data that were charted.	Click here to enter text.
RESULTS			
Selection of sources of evidence	14	Give numbers of sources of evidence screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally using a flow diagram.	Click here to enter text.
Characteristics of sources of evidence	15	For each source of evidence, present characteristics for which data were charted and provide the citations.	Click here to enter text.
Critical appraisal within sources of evidence	16	If done, present data on critical appraisal of included sources of evidence (see item 12).	Click here to enter text.
Results of individual sources of evidence	17	For each included source of evidence, present the relevant data that were charted that relate to the review questions and objectives.	Click here to enter text.
Synthesis of results	18	Summarize and/or present the charting results as they relate to the review questions and objectives.	Click here to enter text.
DISCUSSION			
Summary of evidence	19	Summarize the main results (including an overview of concepts, themes, and types of evidence available), link to the review questions and objectives, and consider the relevance to key groups.	Click here to enter text.
Limitations	20	Discuss the limitations of the scoping review process.	Click here to enter text.
Conclusions	21	Provide a general interpretation of the results with respect to the review questions and objectives, as well as potential implications and/or next steps.	Click here to enter text.
FUNDING			
Funding	22	Describe sources of funding for the included sources of evidence, as well as sources of funding for the scoping review. Describe the role of the funders of the scoping review.	Click here to enter text.

JBI = Joanna Briggs Institute; PRISMA-ScR = Preferred Reporting Items for Systematic reviews and Meta-Analyses extension for Scoping Reviews.

* Where *sources of evidence* (see second footnote) are compiled from, such as bibliographic databases, social media platforms, and Web sites.

† A more inclusive/heterogeneous term used to account for the different types of evidence or data sources (e.g., quantitative and/or qualitative research, expert opinion, and policy documents) that may be eligible in a scoping review as opposed to only studies. This is not to be confused with *information sources* (see first footnote).

‡ The frameworks by Arksey and O’Malley (6) and Levac and colleagues (7) and the JBI guidance (4, 5) refer to the process of data extraction in a scoping review as data charting.

Lampiran 3. Dokumentasi pencarian artikel Data Base PubMed (38 artikel)

Data Base Scopus (118 artikel)

Data Base ProQuest (22 artikel)

Data Base EBSCOhost (2 Artikel)

Data Base Cochrane Library ; Hasil Pencarian Nihil (0 Artikel)

The screenshot shows the Cochrane Library website. The search bar at the top contains the query "children OR child OR teenager OR adolescent AND corona virus pandemic". Below the search bar, it says "0 Cochrane Reviews matching children OR child OR teenager OR adolescent AND corona virus pandemic". A note below states: "Did you mean: childlike | childless | childful". At the bottom of the page, it says "Cochrane Database of Systematic Reviews Issue 6 of 12, June 2022".

Data Base Clinical Key; Hasil Pencarian Nihil (0 Artikel)

The screenshot shows the ClinicalKey website. The search bar at the top contains the query "children OR child AND teenager OR adolescent AND corona virus pandemic". Below the search bar, it says "0 results". A note below states: "Sorry, there are no results that match the search 'children OR child AND teenager OR adolescent AND corona virus pandemic OR covid-19 pandemic OR SARS-CoV-2 pandemic AND psychosocial OR socio psychological'". A link "Try this search with no filters" is provided.

Data Base Springer; Hasil Pencarian Nihil (0 Artikel)

The screenshot shows the SpringerLink website. The search bar at the top contains the query "children OR child OR teenager OR adolescent". Below the search bar, it says "8 Result(s) for 'children OR child OR teenager OR adolescent AND corona virus pandemic' OR 'covid-19 pandemic' OR 'SARS-CoV-2 pandemic' AND psychosocial OR 'socio psychological'". A note below states: "within Biomedicine Article". A link "View All" is provided.

Data Base Neliti dengan kata kunci bahasa inggris dan indonesia; Hasil Pencarian Nihil (0 Artikel)

The screenshot shows the Neliti website. The search bar at the top contains the query "children OR child OR teenager OR adolescent AND corona virus pandemic". Below the search bar, it says "Hasil pencarian tidak ditemukan". A note below states: "Isi halaman web kami selalu bertambah. Kursus kami kembali segera".

Data Base Garuda dengan kata kunci bahasa inggris dan indonesia; **Hasil Pencarian Nihil (0 Artikel)**

The screenshot shows a web browser window with multiple tabs open. The active tab displays the GARUDA database search results for the query "anak-anak ATAU anak remaja DAN 'pandemi virus corona'". The search results are empty, showing a message: "Ditemukan 0 dokumen" (0 documents found). The search filters are set to "Judul" and "Kata kunci". The date filter is set to "0000". The search button is labeled "Mengutip sumber". The top navigation bar includes links for Rumah, Penerbit, Jurnal / Konferensi, Subjek, and Menyarankan. The bottom navigation bar includes links for Sinta, Simlitabmas, Arjuna, PDDIKTI, Risbang, Scopus, and Rama. The footer indicates the search is conducted by the Ministry of Education, Culture, Sports, and Technology.
