Lampiran 5.

Wilks' Lambda test (Rao's approximation):

| | |
|--------------------|----------|
| Lambda | 0.499 |
| F (Observed value) | 5.687 |
| F (Critical value) | 1.812 |
| DF1 | 12 |
| DF2 | 164 |
| p-value | < 0.0001 |
| alpha | 0.05 |

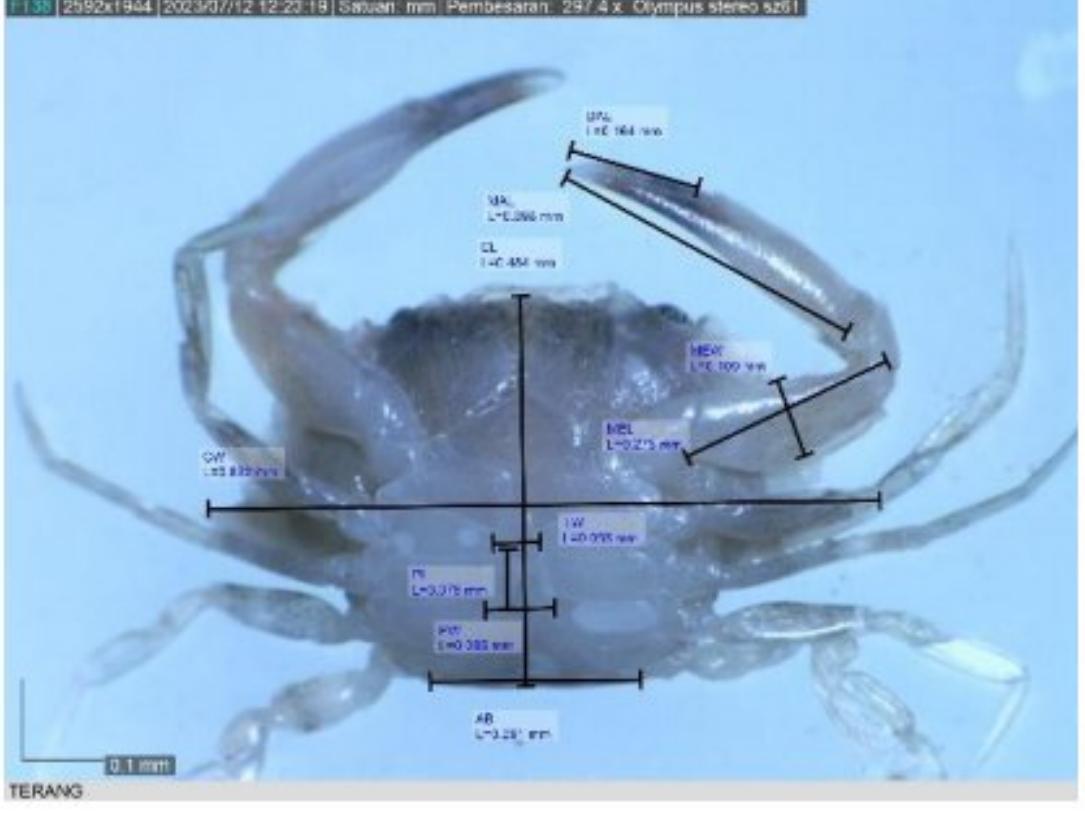

Test interpretation:

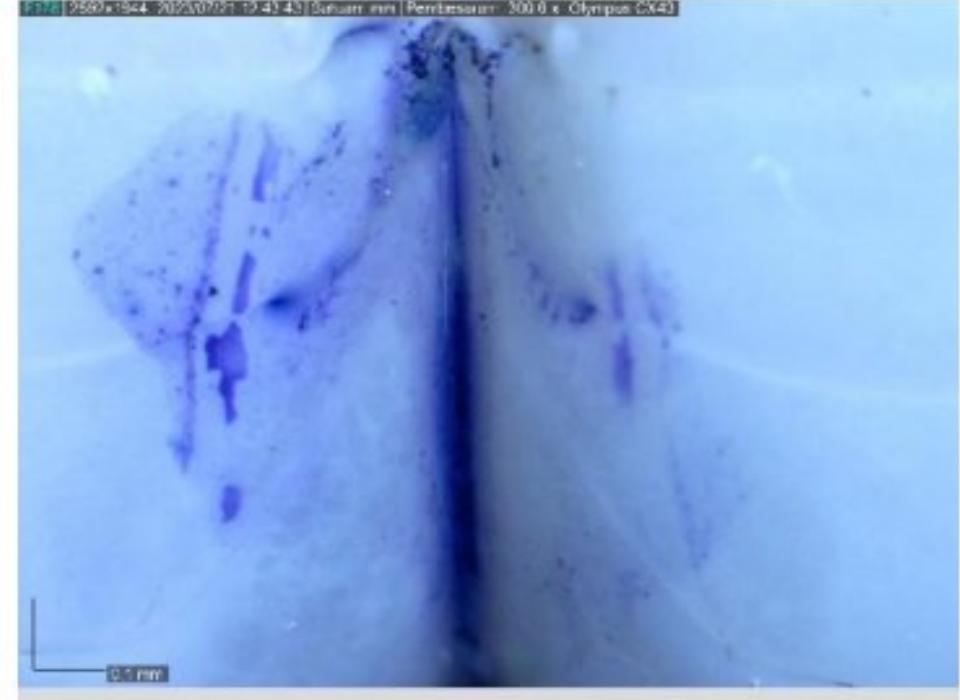

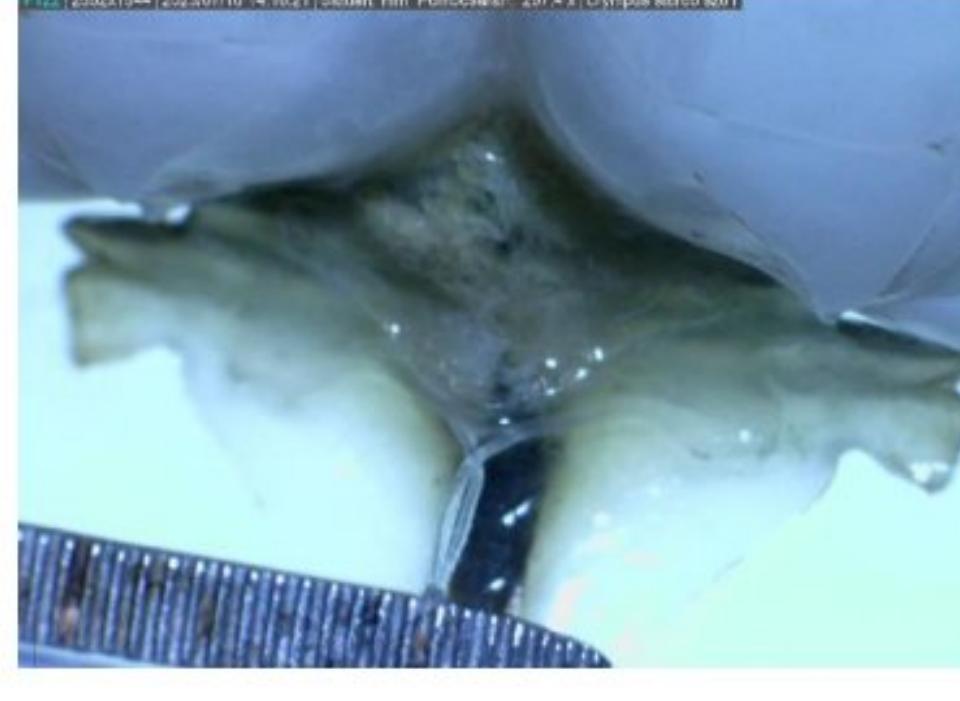

H0: The means vectors of the 3 classes are equal.

Ha: At least one of the means vectors is different from another.

As the computed p-value is lower than the significance level alpha=0.05, one should reject the null hypothesis H0, and accept the alternative hypothesis Ha.

LAMPIRAN 6. Dokumentasi Penelitian
