Lampiran 1 : Skala Fromme Boezart (Tingkatan Visualisasi Lapangan Pembedahan)

- Tingkat 0 = tidak ada perdarahan
- Tingkat 1 = perdarahan ringan, tidak membutuhkan suction
- Tingkat 2 = perdarahan ringan, sesekali membutuhkan suction. Visualisasi lapangan pembedahan tidak terancam.
- Tingkat 3 = perdarahan ringan; diperlukan penyedotan yang sering; perdarahan mengancam lapangan bedah beberapa detik setelah suction dilepaskan
- Tingkat 4: Pendarahan sedang; diperlukan penyedotan yang sering, perdarahan mengancam lapangan bedah langsung setelah suction dilepas
- Tingkat 5: perdarahan hebat: diperlukan suctioning terus-menerus, perdarahan muncul lebih cepat daripada yang dapat dihilangkan dengan suction, lapangan operasi sangat terancam dan pembedahan tidak mungkin dilakukan.

Sangat Baik (Kelas 0–1), Baik (Kelas 2–3), Kurang Baik (Kelas 4–5)
