## LAMPIRAN

### Lampiran 1. Tahapan penetasan *Artemia salina* :

1. Menyiapkan wadah penetasan yang telah berisi air laut.
2. Memasukkan *Artemia* sesuai kebutuhan ke dalam wadah lalu diberi aerasi.
3. Setelah kurang lebih 24 jam, kista *Artemia* akan menetas.
4. Setelah kista menetas, aerasi dihentikan kemudian didiamkan selama kurang lebih 5 - 10 menit.
5. Naupli *Artemia* dipanen dengan mengalirkan dari selang aerasi yang telah disiapkan ke dalam wadah penampungan.
6. Naupli *Artemia* yang sudah dipanen dipisahkan kembali dengan cangkang kista yang masih ada, untuk selanjutnya diberikan ke larva/juwana kuda laut.

**Lampiran 2. Rata-rata pertumbuhan panjang mutlak juwana kuda laut dengan substitusi naupli *Artemia* dengan *Phronima* sp.**
