Missing tissue

Tujuan: Mengetahui banyaknya jaringan yang hilang/ tidak terakomodir dari pencitraan mammografi

Peralatan: CIRS phantom, penanda (*marker*)

Protokol:

- Tempatkan 2 buah marker tegak lurus dinding dada (*chest wall*) di posisi atas (*top*) dan samping phantom (*bottom*).
- marker atas mengacu batas ujung pedal kompresi, marker bawah mengacu batas ujung bucky.
- Lakukan eksposi (bisa menggunakan AEC maupun manual). Jika perlu ulangi 3 kali.
- Analisis citra : Hitung berapa mm *missing tissue* pada penanda atas (*top*) dan bawah (*bottom*)

Kriteria keberterimaan :
mode kontak (normal) ≤ 5 mm
mode pembesaran (magnifikasi) ≤ 7 mm
