 <p>The graph plots the percentage of material passing through each sieve size against the diameter of the particles retained. The x-axis is logarithmic, ranging from 100.00 mm down to 0.01 mm. The y-axis shows the percentage passing, ranging from 0% to 100%. Key points on the curve are labeled with sieve sizes: 3", 2", 1 1/2", 1", 3/4", #4, #10, #20, #40, #60, #100, and #200. Four specific particle sizes are highlighted with green boxes and labeled D60, D50, D30, and D10, corresponding to the 100, 60, 30, and 10 mesh sizes respectively.</p>

Persegi Panjang yang menunjukkan persentase lewatnya (%L) pada setiap ukuran saringan (mm) dan ukuran saringan standar (mm) yang diberikan di atasnya.

Diagram garis yang menunjukkan persentase lewatnya (%L) terhadap ukuran butiran (mm). Dapat dilihat bahwa kurva ini menurun drastis seiring dengan penurunan ukuran butiran, mencapai titik nol pada ukuran butiran sekitar 0.1 mm.
