Lampiran 6. Laju Pertumbuhan Spesifik-One Way Analysis of Variance

Normality Test (Shapiro-Wilk): Passed (P = 0.415)

Equal Variance Test (Brown-Forsythe): Passed (P = 0.882)

Group Name	N	Missing	Mean	Std Dev	SEM
RK	3	0	0.775	0.0570	0.0329
K	3	0	0.689	0.0663	0.0383
RP	3	0	0.790	0.0962	0.0555

Source of Variation	DF	SS	MS	F	P
Between Groups	2	0.0181	0.00904	1.605	0.277
Residual	6	0.0338	0.00563		
Total	8	0.0519			

The differences in the mean values among the treatment groups are not great enough to exclude the possibility that the difference is due to random sampling variability; there is not a statistically significant difference (P = 0.277).

Power of performed test with alpha = 0.050: 0.111

The power of the performed test (0.111) is below the desired power of 0.800. Less than desired power indicates you are less likely to detect a difference when one exists. Negative results should be interpreted cautiously.

Lampiran 7. Biomass Eksponensial fase-One Way Analysis of Variance

Normality Test (Shapiro-Wilk): Passed (P = 0.358)

Equal Variance Test (Brown-Forsythe): Passed (P = 1.000)

Group Name	N	Missing	Mean	Std Dev	SEM
RK	3	0	0.147	0.0231	0.0133
K	3	0	0.133	0.0115	0.00667
RP	3	0	0.160	0.0200	0.0115

Source of Variation	DF	SS	MS	F	P
Between Groups	2	0.00107	0.000533	1.500	0.296
Residual	6	0.00213	0.000356		
Total	8	0.00320			

The differences in the mean values among the treatment groups are not great enough to exclude the possibility that the difference is due to random sampling variability; there is not a statistically significant difference (P = 0.296).

Power of performed test with alpha = 0.050: 0.100

The power of the performed test (0.100) is below the desired power of 0.800. Less than desired power indicates you are less likely to detect a difference when one exists. Negative results should be interpreted cautiously.

Lampiran 8. Biomass Fase Stasioner-One Way Analysis of Variance

Normality Test (Shapiro-Wilk): Passed (P = 0.077)

Equal Variance Test (Brown-Forsythe): Passed (P = 1.000)

Group Name	N	Missing	Mean	Std Dev	SEM
RK	3	0	0.213	0.0115	0.00667
K	3	0	0.227	0.0115	0.00667
RP	3	0	0.233	0.0115	0.00667

Source of Variation	DF	SS	MS	F	P
Between Groups	2	0.000622	0.000311	2.333	0.178
Residual	6	0.000800	0.000133		
Total	8	0.00142			

The differences in the mean values among the treatment groups are not great enough to exclude the possibility that the difference is due to random sampling variability; there is not a statistically significant difference (P = 0.178).

Power of performed test with alpha = 0.050: 0.192

The power of the performed test (0.192) is below the desired power of 0.800.

Less than desired power indicates you are less likely to detect a difference when one exists. Negative results should be interpreted cautiously.

Lampiran 9. Produktivitas Biomassa-One Way Analysis of Variance

Normality Test (Shapiro-Wilk): Passed (P = 0.452)

Equal Variance Test (Brown-Forsythe): Passed (P = 0.800)

Group Name	N	Missing	Mean	Std Dev	SEM
RK	3	0	0.166	0.0207	0.0120
K	3	0	0.156	0.0118	0.00682
RP	3	0	0.184	0.0212	0.0122

Source of Variation	DF	SS	MS	F	P
Between Groups	2	0.00124	0.000621	1.833	0.239
Residual	6	0.00203	0.000339		
Total	8	0.00328			

The differences in the mean values among the treatment groups are not great enough to exclude the possibility that the difference is due to random sampling variability; there is not a statistically significant difference (P = 0.239).

Power of performed test with alpha = 0.050: 0.136

The power of the performed test (0.136) is below the desired power of 0.800.

Less than desired power indicates you are less likely to detect a difference when one exists. Negative results should be interpreted cautiously.

Lampiran 10. Produktivitas Lipid Fase I-One Way Analysis of Variance

Normality Test (Shapiro-Wilk): Passed (P = 0.675)

Equal Variance Test (Brown-Forsythe): Passed (P = 0.766)

Group Name	N	Missing	Mean	Std Dev	SEM
RK	3	0	0.0674	0.0125	0.00720
K	3	0	0.0594	0.00606	0.00350

Lampiran 15. Dokumentasi Kegiatan

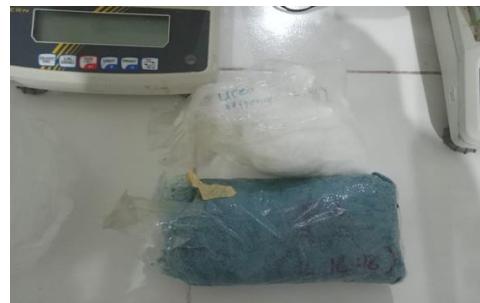

Penyaringan Air Tawar

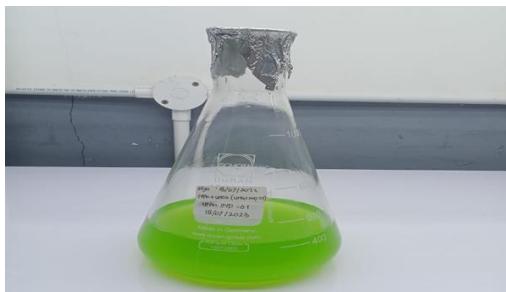

Pengisian air ke Erlenmeyer

Sterilisasi Alat dan Media Kultur

Pupuk Urea dan NPK

Inokulum Mikroalga Isolate UNM IND-1.

Media Pupuk Urea+NPK

Persiapan Ruang Kultur

Proses Penebaran Mikroalga

Pemberian Label Perlakuan

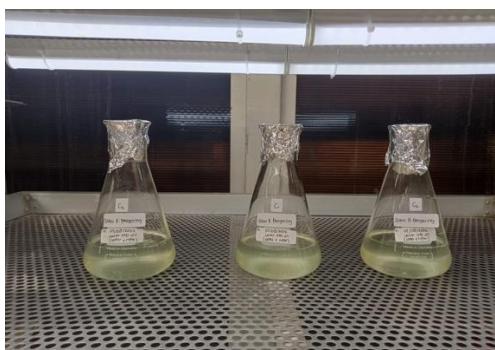

Penambahan nutrisi (Trast Eleman)

Media yang telah ditebari Mikroalga

mikroalga pada perlakuan suhu kamar

Mikroalga perlakuan suhu Pengering

mikroalga pada perlakuan suhu kultur

Pengamatan Sel Mikroalga

Hasil filter sel mikroalga

Pengambilan Sampel Biomassa

Biomassa mikroalga yang terfilter

Hasil Filter Mikroalga diambil dan lipat

Pengeringan Biomassa Mikroalga

Mikroalga di dinginkan didesikator

Menimbang berat biomassa mikroalga

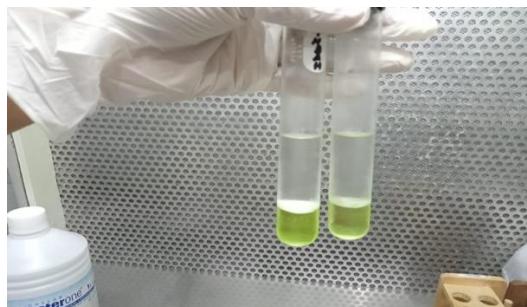

Persiapan Ekstraksi Lipid

Penghancuran Sel Mikroalga

Penambahan (Methanol+Chlorofom+air). Sampel dipindahkan ke tabung reaksi

Sampel yang sudah diinkubasi 24 jam.

Sampel lipid dipindahkan ke vial

Sampel Lipid

Sampel Lipid dievaporasi

Sampel Lipid Yang sudah Diekstraksi

toluene ditambahkan kedalam lipid

Sampel diinkubasi pada penangas air. Sampel yang sudah diinkubasi

Pemindahan fase organic teratas.

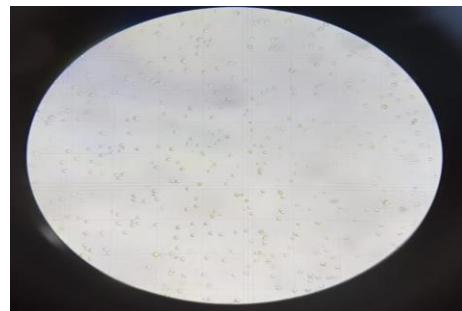

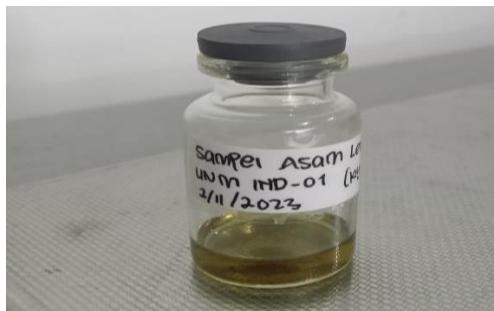

Lapisan sampel yang sudah dipisahkan

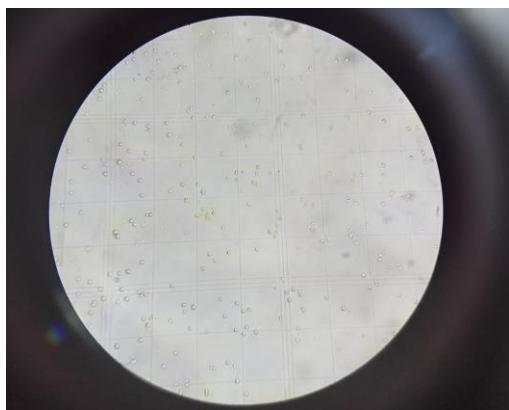

Sampel yang telah dicuci

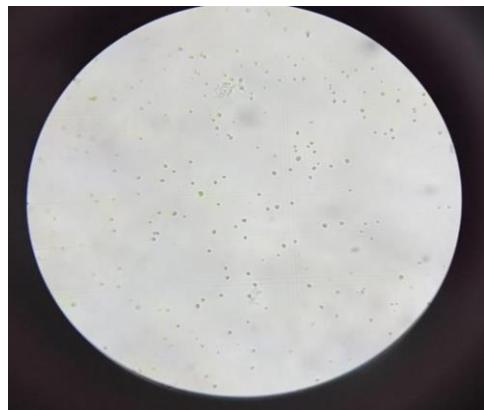

Sampel diuapkan dibawah sinar matahari

Sampel Asam lemak siapkan dianalisi Sel Mikroalga pada Suhu Kultur

Sel Mikroalga pada Suhu Kamar

Sel Mikroalga pada Suhu Pengering

Mikroalga pada suhu kulkas

Kultur mikroalga pada awal penebaran

Kultur Mikroalga Pada H1

Kultur Mikroalga Pada H2

Kultur Mikroalga Pada H3

Kultur Mikroalga Pada H4

Kultur Mikroalga Pada H5

Kultur Mikroalga Pada H6

Kultur Mikroalga Pada H7
