Kepemimpinan dan Berpikir Sistem *(leadership and system thinking)* adalah kompetensi utama kesehatan masyarakat *(core competence of public health)*, di samping kompetensi lainnya. Itulah sebabnya, lingkaran kepemimpinan dan berpikir sistem berada dalam inti lingkaran kompetensi kesehatan masyarakat dan menjadi penggerak bagi kompetensi lainnya. Kepemimpinan Kesehatan Masyarakat memiliki prinsip-prinsip dasar yang dapat berbeda dengan penerapan kepemimpinan pada bidang yang lain, termasuk dalam bidang kesehatan secara umum.

Buku dengan judul **Kepemimpinan dan Berpikir Sistem dalam Kesehatan Masyarakat**, merupakan revisi dari buku *Public Health Leadership* yang pernah terbit sebelumnya. Perubahan ini dilakukan untuk meng-*update* materi sesuai dengan kebutuhan dan permintaan berbagai pihak, apalagi mata kuliah Kepemimpinan dan Berpikir Sistem Kesehatan Masyarakat ini merupakan mata kuliah inti berdasarkan kurikulum nasional bagi Asosiasi Institusi Perguruan Tinggi Kesehatan Masyarakat Indonesia (AIPTKMI). Perbedaan yang sangat mendasar dari isi buku sebelumnya adalah pada buku ini ditambahkan 1 bagian khusus yang membicarakan tentang Berpikir Sistem dan Organisasi Pembelajaran *(Learning Organization)*, yaitu pada Bagian III. Selain itu, juga dilakukan penambahan materi pada Bagian IV berkaitan dengan Penerapan dan Kebutuhan Penelitian Kepemimpinan Kesehatan Masyarakat. Terdapat dua tambahan Bab pada Bagian ini yaitu berkaitan dengan Kepemimpinan dalam Masa Pandemi Covid-19, dan Pengembangan Pulau Sehat *(Healthy Islands)*. Sementara pada Bagian I yang membahas tentang Konsep Dasar, Teori dan Etika Kepemimpinan Kesehatan Masyarakat, dan Bagian II tentang Kompetensi dan Skill Kepemimpinan Kesehatan Masyarakat, tidak terlalu banyak perubahan, kecuali hanya beberapa aspek saja.

Buku ini sangat bagus dibaca oleh para mahasiswa, dosen dan praktisi yang ingin memahami konsep kepemimpinan kesehatan masyarakat secara keseluruhan.
