ABSTRACT

This study aims to determine the form of implementation of Regional Regulation Sinjai no. 08 of 1999 on the conservation, management, and utilization of mangrove forests and the impact of implementation of Regional Regulation No. 08 in 1999 to the community. The study was conducted for 2 months i.e. in May-July 2009 in the village of Tongke-Tongke, East Sinjai district, District Sinjai, Sulawesi Selatan. This research is a case study, this research is done using descriptive and exploratory approach. Sampling methods using Random Sampling Technique or sampling 10% of the population of 700 families of the 70 respondents. The data collected is of primary data is data obtained through direct field observations and interviews with key informants and community who knows the location of the general conditions, including conditions that the people residing near the mangrove forests while the secondary data is data obtained from intansi government, literature and the results of existing research. Based on the results of research that the implementation of Sinjai Regional Regulation number 08 of 1999 on Conservation, Management and Utilization of Mangrove positive or negative impact on government, society, and to the sustainability of forests. Viewed from the level of community involvement and knowledge about the implementation of the Regional Regulation No. 08 in 1999 so far has not shown significant implications on the society or are still quite effective. This is caused by a lack of socialization / education, the existence of a prolonged conflict between the government and society to the status of land ownership and lack of legal awareness of the community.
