Abstract: Village Allocation Fund, hereinafter referred to as ADD, is the balance of funds received by the district/city in the State Revenue and Expenditure district/city after deducting the Special Allocation Fund. This study aims to analyze the factors influencing auditee satisfaction among village officials. The research objects were village officials in Bantaeng regency. This empirical study used the purposive sampling technique in the data collection. It also used the quantitative approach. The data were obtained by distributing questionnaires to 138 heads of village and other village officials. The response rate was 70.29% (97 questionnaires) and the usable response rate was 68.11% (94 questionnaires). The analysis was conducted using the multiple linear regression method with SPSS 20.0. The results reveal that: (1) the experience of audit team does not have significant influence on auditee satisfaction among the village officials; (2) understanding about village environment does not have significant influence on auditee satisfaction among the village officials; (3) responsiveness towards the needs of village officials; (4) conducting examination based on audit common standards does not have significant influence on auditee satisfaction among the village officials; and (5) the involvement of the head of audit team does not have significant influence on auditee satisfaction among the village officials.
