Abstract

Key word:
Waterfront development, Urban revitalization, Urban Design Guidelines

Edge Area (waterfront area) being face mirror a city (well come area) where a large part building to orientate to waters, in city development Makassar with increase it business activity intensity causes conflict of interest existence in space utilization (space use) making edge area (coast, river) becoming confused (chaos) with become dirty. Condition mortally without present it city development pilot (urban design guideline) more specific to aim entire developments actions by privates and governments with societies. Fact push coast city at split world to revitalization returning in a edge area development in wrought concept (waterfront development) promise various new opportunity innovative recreative especially for tourism development.
WATERFRONT DEVELOPMENT CONCEPT
TOURISM ZONE

Abstract
Key word;
Waterfront development, Urban revitalization, Urban Design Guidelines

Edge Area (waterfront area) being face mirror a city (wellcome area) where a large part
building to orientate to waters, in city development Makassar with increase it
business activity intensity causes conflict of interest
existence in space utilization (space use) making
edge area (cast, river) becoming confused (chaos)
with become dirty. Condition mentally without present it
city development pilot (urban design guideline) more specific
to aim entire developments actions by privates and
governments with societies. Fact push coast city at split
world to revitalization returning in a edge area
development Imwork concept (waterfront
development) promise various
new opportunity innovative recreational especially for
tourism development.
