Programme ............................................................................................................................................................... ix

WATER AND HUMAN SETTLEMENT

Buginese Waterfront Settlement and Their Livelihood In Jakarta Coastal Area by Hendro Prabowo, Agus Suparman, Wahyu Prakoso, and Agung Wahyudi .......................................................... 1
Fishing Village as Playing Context for Children: Analysis of Children Activities in Rural Architecture by Ismail Said .......................................................... 11
Analyzing of Passive System Design of Traditional Houses in the Tropical Lowland. Case Study: Madura Traditional Houses by Rosalia Niniek Srilestari, Mas Santos, and I G. N. Antaryama .................................................. 25
Canal Community Development And The Local Sustainability by Joyce M. Laurens ......... 35
Harmony Living With Nature. Learning from Sentani Lake Human Settlement by Moerdjoko .......................................................... 51
Water Efficiency in Housing Development by Sigit Wijaksmono and Bob Saragih ................. 57
Connectivity between the Water, Foreshore and the Hinterland in Coastal Settlements. Case Study: Pancer-Banyuwangi (Hit By Tsunami In 1995) by Himasari Hanan .................. 65
Fishing Settlements: A Sustainable Coastal Architecture of Surabaya, Indonesia by Endang Titi Sunarti Darjosanjoto .......................................................... 73
Macro and Micro Space Analysis of Fisherman Housing At Coastal Area “Boddia” by Idawarni .................................................................................................................. 83
Spatial Mixing and Fluidity In Lae-Lae Isle. A Study On Behavior and Physical Setting by Afifah Harisah, Asniawaty, and Nasruddin Junus .................................................................................................. 93
Development of Relationship between Water Body and Human Settlement. Cases: Cities In Indonesia by Agus Budi Purnomo .................................................................................................. 101
Sumur: System Value Changes In Urban-Javanese Kampung by Endah Tisnawati and Waluya Hadi .................................................................................................................. 113
Concept Of Coastal Society Housing Development by Yusni Mustari & Suriana La Tanrang .......................................................................................................................... 119
Fisherman’s Houses Morphology At Galesong, Regency Of Takalar by Samsuddin Amin and Nurmaida Amri ........................................................................................................... 123
Tetean: A Sustainable Place in Bajonese Coastal Settlement. Case Study: Bajoe Village in Bone Regency, South Sulawesi by Ria Wikantari and Syahriana Syam ................................................................... 133

SUSTAINABLE PLANNING AND DESIGN

Sustainable Planning and Construction for Water Friendly Architecture - Lessons from the Tsunami by Stephen S.Y. Lau .................................................................................................................. 145
Sustainable Spatial Development Plan of River Basin In Urban Areas, A Study Case of West Jakarta by Ady Rizalsyah Thahir ................................................................................................... 155
Usage of Air-Conditioners and Windows in Residential Areas in Johor Bahru City: Planning Methods of Coastal Residential Areas In Consideration of Wind Flow by Tetsu Kubota .......................................................................................................................... 165

The Implication of The Usage of Open Space of Sentral Market of Kendari City on Planning of Public Space on Water Front Kendari Bay by Arman Faslih, Dwi Rinnursari Noraduola, and Kurniaty Ornam ........................................................................ 175

The Role of Green Building Tools in Promoting Water Sustainability in the Lifecycle of Residential Buildings by Baharuddin, Stephen S.Y. Lau, and Rosady Mulyadi ........................................................................................................ 183

The Stepping Water Cascade Skylight in Surabaya: Energy Savings by Danny Santoso Mintorogo ........................................................................................................................................ 193

How Buildings in ‘Code’ Riverbank Should Respond to Water by S. Felasari ...................................................................................................................................................... 201

Archipelascpe. A Master Plan for Regenerating the Archipelagic Country by Budi Prayitno ........................................................................................................................................... 209

Optimalisation Planning and Site Design As Effort to Sustainable Development by Nashrah Arsyad ...................................................................................................................................... 215

Efficient Energy Material for the Coastal City Building. Case Study Solid Clay Block Material in Surabaya by V. Totok Noerwasto and Mas Santosa ........................................................................................................................................ 219

Natural Ventilation and Its Influence on Thermal Conditions of Colonial Houses in the Coastal Region of Lamongan-Indonesia by Arina Hayati and I Gusti Ngarah Antaryama ........................................................................................................... 227

Revitalizing Tourist Development and Conservation of Coastal Mangrove Ecology as Part of Architectural Landmark for Southernmost Tip of Asian Continent by Mohd Hamdan Ahmad, Dilsan Remaz Ossen, and Agung Murti Nugroho ........................................................................................................................................... 235

Losari: Waterfront and Public Space of Makassar by Khilda Wildana Nur, Rosady Mulyadi, and Ramli Rahim ........................................................................................................................................ 243

The Effectiveness of Waterfall as a Passive Evaporative Cooling In Tropical Climate. Case Study: Singapore Polytechnic Graduates’ Guild by Agus Dwi Hariyanto ............................................................................................................. 249

Sustainable Ecology Aspect of Architecture House of Dutch Colonial at Tropical Climate by Rahmi Amin Ishak ........................................................................................................................................... 259

Safety Planning for Irrigation Construction Project by Suhrman Hamzah ...................................................................................................................................................... 267

Urban Tourism and Mice at Makassar Coastal Area by Shirly Wunas and Andini Radisyia Pratwi ...................................................................................................................................................... 275

Environment Preservation Effort for Coastal Area Development by Zenaide Toban ...................................................................................................................................................... 281

Rethinking the Waterfront Development by S. Trisutomo ...................................................................................................................................................... 283

Approaches to Sustainable Architecture to Resort Developments at Coastal Areas by Mariam Jamaludin and Abd. Rahim Awang ........................................................................................................................................... 295

Water Friendly Coastal City by Ananto Yudono ...................................................................................................................................................... 315

Ciliwung Riverbank Development In Jakarta: Challenges, Opportunities And Strategies by Tulas Widiarso and Imron Sofyan ........................................................................................................................................... 321

**COPING WITH WATER DISASTER**

Study of Damage Cause of Elementary School Building in Coastal Area Case Study: Subang, West Java by Sugeng Triyadi S. and Andi Harapan S. ........................................................................................................................................... 331

Water Damages on Building: The Role of Roof’s Design by Bambang Totopambudi and Lily Tambunan ........................................................................................................................................... 339
Water Disaster Preparedness Condition in Tsunami Prone Area. Case Study: Banyuwangi, East Java by Lily Tambunan and Andry Widyowijantoko

WATER FOR LEISURE AND DAILY USES

H2O – Water. HHO – High Healthy Olfactory. Water and Odors in the Architecture system by Arya Ronald

Designing Area Along-Side Urban Drainage into Green Open-Space and Water for Leisure (Case Study: Along Side Urban Drainage at Raya Jemursari Street-Surabaya) by Wanda W. Canadarma and Luciana Kristanto

Public Assessment in the Planning of Tanjung Bunga Recreation Area – Makassar by Riekje H. Pangkerego and Ihsan

Tourism and Environmental Quality in Makassar West Coast by Triyatni

Water as an Urban Esthetic by Bambang Heryanto

THERMAL AND ENVIRONMENTAL ARCHITECTURE

Outdoor Thermal Environment Surrounding Water Elements in Hot Humid Area by Surjamanto Wonorahardjo and M. Donny Koerniawan

Image of Village Architecture in the Watery Area and Its Environment Influences to the Building through Opening by FX Teddy Badai Samodra and Mas Santosa

The Optimum Solar Chimney Geometry for Stack Ventilation in Malaysian Condition by Agung Murti Nagroho and Mohd Hamdan Ahmad

Thermal Performance of Skin Construction System of Javanese Village Houses in the Coastal as the Lowest Altitude Region by FX Teddy Badai Samodra and Mas Santosa

A Study of Thermal Comfort in Mosque of Al-Markaz Al-Islamy Makassar by Susita Mulassari Samad, Nurul Jamala, and Ramli Rahim

Thermal Comfort at Production Room of Butsudan Industry in Makassar by Mustamin Rahim, Rosady Mulyadi, and Muhammad Irwan

Thermal Comfort, Waterfront and the Outdoor Utility Pattern a Case Study of the Waterfront Leisure Area in Singapore by Inavonna

Role of Waterfront in Creating Environment Comfort Town by Juhana

The Thermal Behavior at a High Density Environment. Case Study in Surabaya/Surakarta, Malang, and Sumenep by B. Heru Santoso, and Mas Santosa

STRUCTURE AND MATERIAL

Effect of Sulfate Waters on Compressive Strength of Portland Pozzolan Cement Mortar by M. Wihardi Tjaronge, Herman Parung, Stefen and Linda

Innovative Material for Sea-Environment Friendly Concrete Structures by Rudy Djamaluddin

Influence of Sea Water on Flexural and Compressive Strength of Portland Pozzolan Cement Mortar by M. Wihardi Tjaronge, Abd. Madjid Akkas, and Farhan Day

POSTERS PRESENTATION

Manado’s Coastal Line Area Development. A Concept of Urban Design and Environmental Management of Water Front City by Jeffrey I. Kindangen

Makassar Canals Countenance by Asniawaty, Nasruddin Junus, and Afifah Harisah
Coastal Area Design Principles by Isfa Sastrawati ................................................................. 487

Water Friendly Place Bajonese Coastal Settlement Bone, Sulawesi Selatan by Syahriana Syam and Ria Wikantari .......................................................... 491

Waterfront Development Concept Tourism Zone by Baharuddin Koddeng .................. 492

List of Authors ......................................................................................................................... 495
