## Lampiran

### A. Daftar Checklist Pengkajian Kualitas Scoping Review

Cooper et al.

13

**Table 3.** The Scoping Review Checklist.

Key criteria	Checklist items	Score one point for each item
1. Study aim, purpose, and research question	<ol style="list-style-type: none"> <li>1. The rationale/purpose for the scoping review was stated.</li> <li>2. Appropriate scoping review methodology was used.</li> <li>3. At least two reviewers conducted the review.</li> <li>4. The research question/s was/were used to guide the scope of inquiry (participants, concept, and context included<sup>a</sup>).</li> </ol>	
2. Relevant studies	<ol style="list-style-type: none"> <li>5. An in-depth literature search was conducted to identify all relevant literature.<sup>b</sup></li> <li>6. A comprehensive list of relevant studies that balances breadth with feasibility was identified.</li> </ol>	
3. Study selection	<ol style="list-style-type: none"> <li>7. The inclusion and exclusion criteria were clearly described and were used to determine eligibility of studies.</li> <li>8. The study selection involved an iterative process, including searching the literature, refining the search strategy, and reviewing articles for inclusion.</li> <li>9. At least two reviewers independently reviewed the title and abstracts and reached consensus on studies for inclusion.</li> <li>10. The study selection process was summarized in a flow chart.</li> </ol>	
4. Charting the data	<ol style="list-style-type: none"> <li>11. The research team collectively developed a data charting format and determined which variables to extract to answer the research question.</li> <li>12. The data were charted through sifting and sorting; tables include study details based on full texts.</li> <li>13. A numerical analysis of the extent and nature of included studies was reported.</li> <li>14. The quality of papers was assessed.<sup>c</sup></li> </ol>	
5. Collating, summarizing, and reporting the results	<ol style="list-style-type: none"> <li>15. Results were presented in a logical descriptive or diagrammatic or tabular format.</li> <li>16. A narrative account of results was presented.</li> <li>17. The results were aligned with the review aim, purpose/research question/s.</li> <li>18. Issues associated with bias were discussed.</li> <li>19. Implications for future research, education, practice, and/or policy were discussed.</li> <li>20. The conclusion described the current state of the overall literature in relation to the topic.</li> </ol>	
	Total	20 points

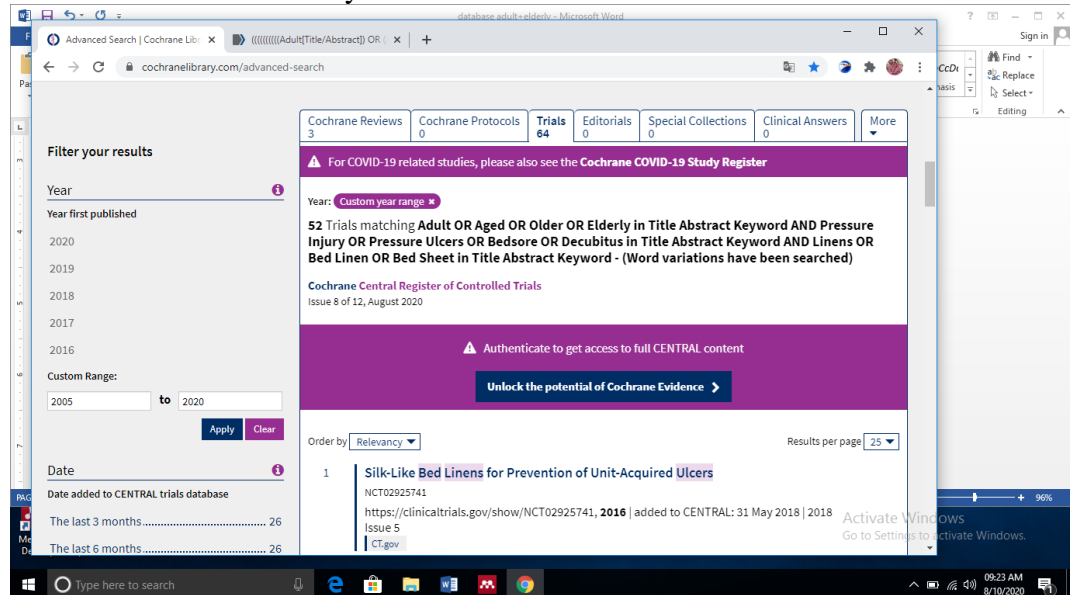

**Table 3. (continued)**

Key criteria	Checklist items	Score one point for each item
6. Optional stage: consultation	Stakeholder/participant voices were included in the review when appropriate. If included: 21. The process of stakeholder consultation was clearly described. 22. Findings were re-examined in the light of stakeholder input, to justify final conclusions.	
	Total	22 points
Additional guidance	a. Item 4: Scoping reviews have a broad scope with even broader inclusion criteria, so participants may be selected from a wide group. The concept (area of interest/condition being explored, etc.) will also have a wide remit and the context may be left open, for example, any health care setting in any region. b. Item 5: This should include searches of an adequate number of different sources (databases/electronic sources, research registers; reference lists/hand searches, etc.). c. Item 14: Paper quality should also include a check to ensure that reports have not been retracted.	

## B. Lampiran Pencarian Artikel

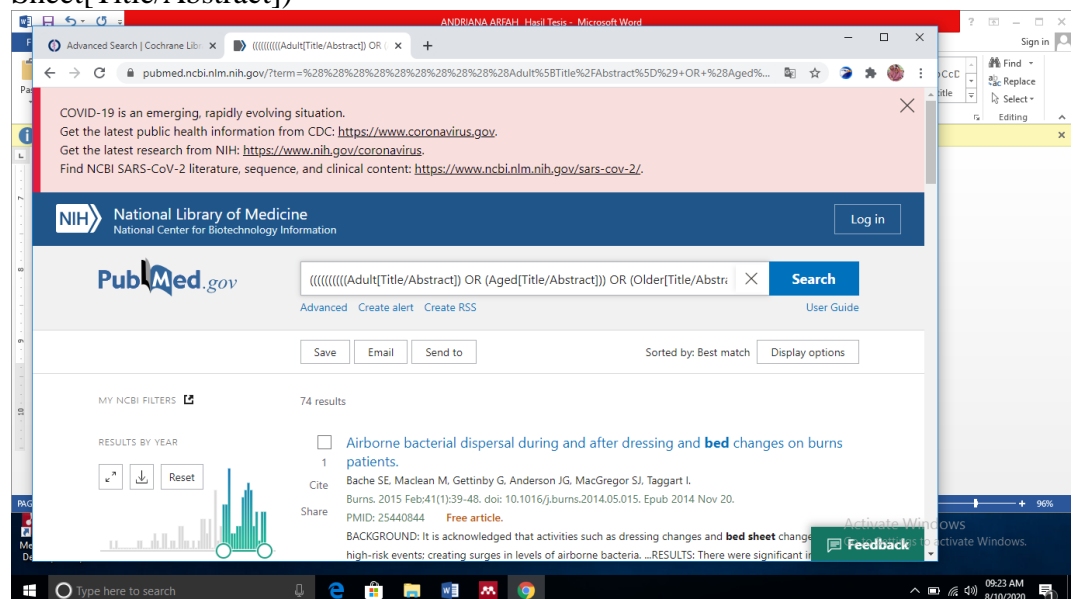

### 1. Pencarian Cochrane Library

**Kata Kunci:** Adult OR Aged OR Older OR Elderly in Title Abstract Keyword AND Pressure Injury OR Pressure Ulcers OR Bedsore OR Decubitus in Title Abstract Keyword AND Linens OR Bed Linen OR Bed Sheet in Title Abstract Keyword

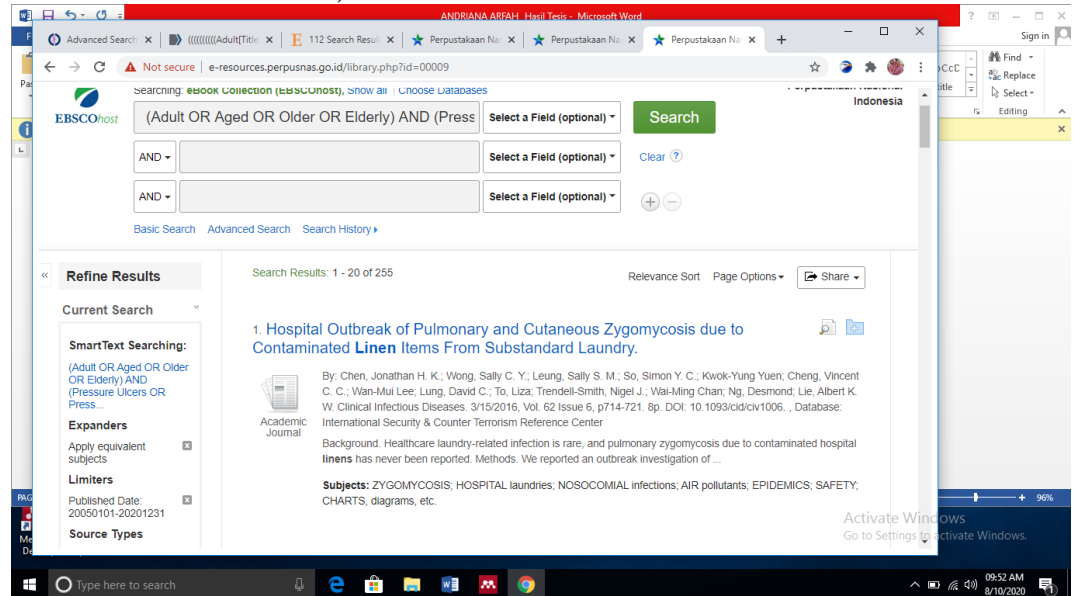

### 2. Pencarian PubMed

**Kata Kunci:** (((((((((((Adult[Title/Abstract]) OR (Aged[Title/Abstract]) OR (Older[Title/Abstract]) OR (Elderly[Title/Abstract]) AND (Pressure Injury[Title/Abstract]) OR (Pressure Ulcers[Title/Abstract]) OR (Bedsore[Title/Abstract]) OR (Decubitus[Title/Abstract]) AND (Linens[Title/Abstract]) OR (Bed linen[Title/Abstract]) OR (Bed Sheet[Title/Abstract])))))).

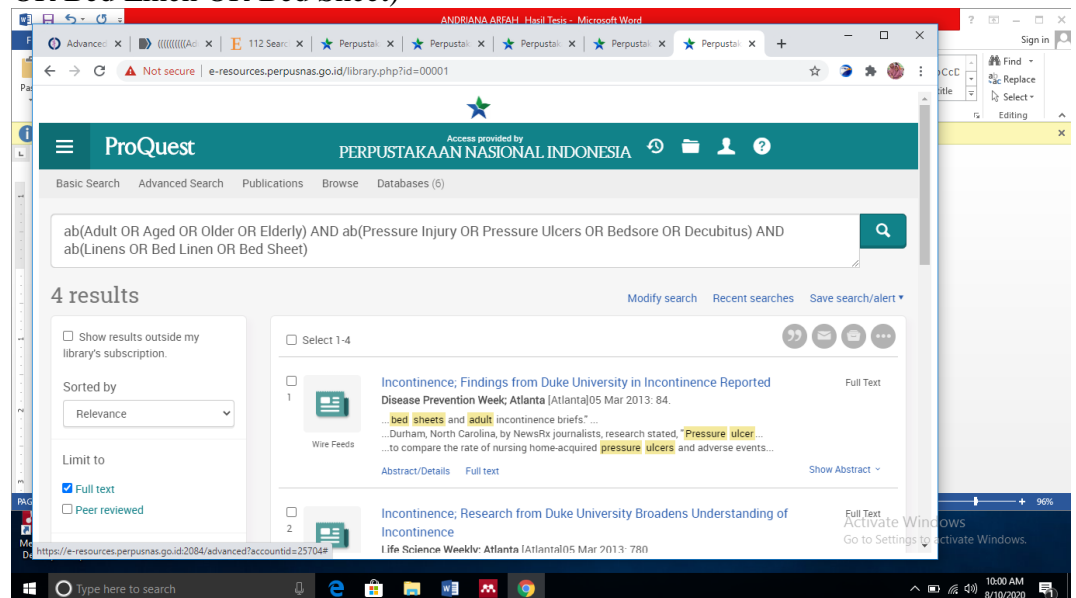

### 3. Pencarian EBSCO
