APPENDIX A

Observation Checklist for Media Used In Teaching English

Teacher's name : Mr.D

Class : XI IPA 1

No.	Pernyataan	Ya	Tidak
1.	Guru menggunakan media dalam menyampaikan materi pembelajaran	✓	
2.	Guru menggunakan media audio a. Radio b. CD c. MP3		
3.	Guru menggunakan media visual a. Animation b. Over Head Projector (OHP) c. LCD Projector d. Whiteboard	✓ ✓	
4.	Guru menggunakan media audio-visual a. Video/VCD b. Television		
5.	Guru menggunakan media grafis a. Poster b. Flaschcards c. Chart d. Picture		
6.	Guru menggunakan media a. Buku Paket b. Kamus	✓ ✓	
7.	Guru menggunakan objek yang ada disekitarnya sebagai media pembelajaran		

Appendix 2

Interview Guide For the Students

1. When you study English, does the teacher use media?
2. What media does your teacher use in teaching English?
3. Would you like it when your teacher used the media? Why?
4. Can using this media help you find new ideas? Why?
5. Does using this media make you more skilled?
6. Does using this media make it easier for you to understand English subject matter? Why?
7. Does using the media make you more active in learning? Why?
8. Can the media help you increase your English vocabulary? Why?
9. If the teacher uses media in teaching, can it inspire you to learn English? Why?
10. Is using the media less useful in helping you learn English? Why?

APPENDIX C

Result Interview Class XI MIPA 1

Question 1 : When you study English, does the teacher use media?

Student	Answer
Student 1	Yes, our English teacher uses media, namely textbooks in the teaching and learning process
Student 2	Yes
Student 3	Yes
Student 4	Yes
Student 5	Yes
Student 6	Yes, teachers use media to teach
Student 7	Yes
Student 8	Yes
Student 9	Yes
Student 10	Yes
Student 11	Yes
Student 12	Yes
Student 13	Yes
Student 14	Yes
Student 15	Yes

Question 2 : What media does your teacher use in teaching English?

Student	Answer
Student 1	The media used by our teachers in teaching English is Englishbook
Student 2	Englishbook and whiteboard
Student 3	Englishbook and whiteboard
Student 4	Englishbook
Student 5	Englishbook
Student 6	The media used by the teacher in teaching English is a Englishbook with a whiteboard
Student 7	Englishbook and Whiteboard
Student 8	Englishbook and Whiteboard
Student 9	Whiteboard and englishbook
Student 10	Whiteboard and Englishbook
Student 11	Englishbook and Whiteboard
Student 12	Englishbook and whiteboard
Student 13	Whiteboard and englishbook
Student 14	Englishbook
Student 15	Whiteboard and Englishbook

Question 3 : Would you like it when your teacher used the media? Why?

Student	Answer
Student 1	Yes, happy because with textbooks we can more easily understand the lessons given by the teacher
Student 2	Yes, I'm happy because by using the media, it's easier for us to understand
Student 3	Happy, because it's clearer if you explain it on the blackboard rather than saying it directly
Student 4	Aii..sometimes happy sometimes not. I'm glad the material is understandable. If you are not happy, that is, if you don't understand the material
Student 5	I'm happy because the package book has all been explained, it's complete, so to be honest, I personally prefer reading when studying
Student 6	Yes, I'm happy because if the teacher uses the textbook we can understand quickly, while using the whiteboard it can be more helpful
Student 7	Yes, I'm happy because it's easier to understand because uh... the person (the teacher) is just fun, not too serious, can always be funny
Student 8	Yes, I'm happy because, uh... I can follow what the teacher says while reading the textbook
Student 9	There is joy, there is displeasure. I'm not happy because erm...the textbook isn't good because it's just material without practice...um...it doesn't feel right. Also happy because his teacher really likes to joke. Besides helping the teacher in explaining the material, it also helps my friends in understanding the material
Student 10	I don't think so, because in the package it is not clear what is explained in it
Student 11	It could be, because they are used to the media
Student 12	Not really, because the teacher is only based on that media (Englishbook)
Student 13	Sometimes, because sometimes it is understood, sometimes it is not
Student 14	Yes, because the media makes it easier to understand the lesson
Student 15	Yes, because by using media it is easier for us to understand the material presented by the teacher

Question 4 : Does using this media make it easier for you to understand English subject matter? Why?

Student	Answer
Student 1	Yes, because um..in the package book um..there's everything in the explanation so just um..a few words explained by the teacher
Student 2	Yes, it's because, um... in the package book, it's already written. We can already understand um.. the pronoun , they read like that
Student 3	Yes, it's easier because um..it's written on the whiteboard so it's easy to understand
Student 4	Sometimes it's easy, sometimes not. If you make it easy, it's like if explained carefully by the father (teacher) it's easy to understand. But if not, it's not understood if you just give assignments but don't explain them properly
Student 5	That's right, because the media allows the teacher to provide more explanation about the material provided
Student 6	Yes, if the teacher uses the media in teaching English it makes it easier because we can catch quickly what is being explained
Student 7	Yes, because uh... we can read the media right away, like media from a textbook, we can read it right away. With the existence of visual media and erm.. then the teacher can immediately explain anything that you don't understand
Student 8	Yes, because it is easier to understand because it is directly read
Student 9	Yes, because um.. the teacher is good at explaining, the teacher is cool
Student 10	Not really, the problem is only given questions, and if it's English it's better to use google translate so it can be understood, while at school we are forbidden to bring handphone
Student 11	Yes, because the blackboard writes English words that are difficult for students to write, such as instructions, where the words are difficult for students to write.
Student 12	Not really, because I often don't understand explanations through the media. Therefore, after school, I studied again by using education apps
Student 13	No, because it's hard to understand
Student 14	Yes, because by using printed books, students have the opportunity to read books and also make it easier to answer questions
Student 15	Yes, because for example when the teacher only says an English vocabulary the students do not know how to write the letters

Question 5 : Can using this media help you find new ideas? Why?

Student	Answer
Student 1	Yes, because in English, uh... there are often things like poetry that are learned now, now in poetry there are things like figurative language that are learned, there are pictures, so we can take an example if we want to draw something because the pictures are beautiful because I also like to draw, so that's where I got the idea
Student 2	Very helpful, the reason is because of the good placement of the words
Student 3	Yes, because for example there is a picture written on the blackboard like that it enters the brain faster, it's like it's more digestible
Student 4	No, usually I don't understand because I don't really know English
Student 5	Not enough. Because I just lack ideas, I feel bored when I always use textbooks while studying, so it's like I can't find new ideas
Student 6	Yes, it can help us find new ideas because from there we can appreciate the ideas that arise in our minds
Student 7	Yes, because with this media we can come up with new ideas from ee..or can provide motivation to provide ideas for ee..be even more enthusiastic about learning English
Student 8	Yes, very helpful. Because I feel I can find new vocabulary
Student 9	Yes, because if you have explained it on the blackboard, new ideas are usually obtained, such as how to pronounce English sentences, because usually you practice how to pronounce these sentences
Student 10	Not really, because the media is the same, sis, it doesn't change from elementary to high school, it keeps being used, so it's very boring
Student 11	No, because the media that is displayed is just that-that's all
Student 12	Not really, because the creativity of students is very limited. Therefore, I rarely come up with new ideas
Student 13	Yes, because with books we find new ideas
Student 14	Yes, because by using printed books, students can more freely find new ideas through what they read
Student 15	That's right, because new ideas arise for people who are enthusiastic about learning, and the enthusiasm of students depends on the teacher, and the media used helps the teacher in explaining, so the teacher can be excited with the help of the media.

Question 6 : Does using this media make you more skilled? Why?

Student	Answer
Student 1	Yes, it's more skilled because if you learn English using a textbook you can automatically read it so you can practice your skills in speaking English
Student 2	Sometimes sis, because I don't really understand English lessons
Student 3	Yes, skilled, because for example there is also an assignment, then we are told to write on the blackboard, so it's like um... I have experience in writing on the blackboard, it's like training my self-confidence
Student 4	It's a bit sis, usually I don't really understand English, I can't understand it
Student 5	I'm still a bit unskilled, because if we speak English we can learn to write more, I usually write in English like there are mistakes, like writing the pronoun.
Student 6	Yes, it makes us more skilled because if we use the textbook we can see firsthand what the teacher will explain
Student 7	Yes, because umm...can quickly think of answers, trains my confidence when I go up to write on the whiteboard, if there are questions from the teacher they can be answered immediately
Student 8	Yes, he is more skilled, because can see the writing like this and how to pronounce like this
Student 9	A little bit skilled, because I personally don't really understand English if it hasn't been explained
Student 10	That's right, because the media helps us find new vocabulary and the teacher helps us in pronouncing it
Student 11	Not really, because I only use books and white boards
Student 12	Yes, because after reading books we find new ideas and of course we will be more skilled
Student 13	Skilled sis, in terms of writing, because every teacher uses a textbook, of course they are asked to write
Student 14	Yes, because with the existence of a medium we get new vocabulary and make us find out the meaning and placement of the vocabulary
Student 15	Maybe, because we can write on the blackboard what we want

Question 7 : Does using the media make you more active in learning? Why?

Student	Answer
Student 1	In my opinion, it's more active because if for example we study... by using a textbook, we can go up and write on the blackboard to do the assignments given by the teacher, practice my public speaking as well...
Student 2	Yes, he is more active, because usually Mr. Disman, um.. used to order us to read each material one by one
Student 3	Yes, they are more active, because for example using textbooks, we are usually told to read or usually we are asked to do assignments
Student 4	Not very active, because the use of teaching media is very limited and very boring
Student 5	More active, because usually Mr. Disman when teaching, usually tells us to read, now reading is what makes me active while studying because reading is also my hobby
Student 6	Yes, it can make us more effective and active in learning, usually we are told by the teacher to come to the front of the blackboard to write what we know
Student 7	Yes, because with this media we are more enthusiastic, eager to learn and eager to find out about previous lessons
Student 8	Yes, more active, because he can see the material, and can also ask questions if something is not understood
Student 9	Yes, because the teacher is also active, so if the teacher is active and the teacher is humorous, the students can become even more active
Student 10	That's right, because the media makes the teacher active in explaining and we are also active in listening during the learning process
Student 11	Yes, because there is no use of handpone while studying. So from that I actively opened the material in the book and opened the dictionary
Student 12	Yes, because the media makes lessons easier to understand
Student 13	Sometimes sis, because if you keep using the package book, it's boring anyway
Student 14	Yes, because in the textbook there are tasks and dialogs that are read
Student 15	No, because books and blackboards have been used since elementary school

Question 8 : Can the media help you increase your English vocabulary? Why?

Student	Answer
Student 1	Yes, there are lots of new vocabulary if we use englishbook
Student 2	Very helpful because there are new words that I know
Student 3	Very helpful, because uh... there must be words that we don't know, then we are told to read them, then we are told to translate them too, so we can get new vocabulary
Student 4	Yes, it helped me
Student 5	Yes, it's really helpful sis
Student 6	Yes it helps, for example the textbook media can help us find new vocabulary because, um... in textbooks the vocabulary is usually written or used to tell us to memorize the vocabulary
Student 7	Yes, because every um..a lot of words in the textbook can add new insights then new insights we look for the meaning of the words
Student 8	Yes, because many new words are helpful
Student 9	Yes, because a lot of vocabulary is foreign to me, so in my opinion, the textbook is very helpful in discovering new vocabulary
Student 10	Yes, because after reading a book we will definitely find words that we don't know and of course we will look for the meaning of the vocabulary, of course the vocabulary we have will increase
Student 11	Yes, because I often open the dictionary and it makes my vocabulary grow
Student 12	Yes, add because every time you read there must be new vocabulary found
Student 13	That's right, because in the media there are lots of new vocabulary that can be learned
Student 14	Yes, because there are still many unknown vocabulary words in the englishbook
Student 15	Yes, because the textbook contains a lot of new words. And the blackboard, the teacher can write vocabulary that is rarely known

Question 9 : If the teacher uses media in teaching, can it inspires you to learn English? Why?

Student	Answer
Student 1	It's not bad, because if you just explain it, sometimes you don't understand what is said in English, so if you use a textbook, you can understand what the teacher said and meant
Student 2	Yes, I'm excited because um... I want to know more about the words or the meaning of the words in the Englishbook
Student 3	Yes, because um... it's like for example if you use the media you understand faster, whereas if you don't use the media like um... just put it in your ear and then um... later when you finish the lesson you will almost forget it
Student 4	No, because I am very limited in English, I am very constrained in terms of English
Student 5	Yes, because that was the reason, if print media is like a textbook, I really like to read
Student 6	Yes, it can awaken our enthusiasm for learning, for example on the blackboard we are scrambling to go up and write down the answers
Student 7	Yes, because they are more enthusiastic about using and doing tasks
Student 8	Yes, because learning English is very fun because the teacher is also fun and humorous
Student 9	Yes, because um...the teacher is also enthusiastic, the students must also be enthusiastic
Student 10	That's right. Because the teacher is passionate about making us students join the spirit
Student 11	Not really, because if you only use the media, many students feel bored
Student 12	Yes, because the media is very helpful because lessons become easier to understand
Student 13	No, sis, because I'm bored, I just keep on playing the media
Student 14	Yes, because sometimes students at the teacher answer questions at the whiteboard
Student 15	Yes, because if you don't use the media it feels boring

Question 10 : Is using the media less useful in helping you learn English? Why?

Student	Answer
Student 1	It's very useful, because everyone is here to take on your assignment, at the same time the materials are all inside so, automatically we can look for answers in the englishbook
Student 2	Useful, because if there is a textbook it is easier to understand, than if you speak directly, it is not easy for me to understand
Student 3	I think it's useful, because if it's the same as before, if for example using a whiteboard or textbook it's more understandable
Student 4	Less useful, because the textbook is very boring in my opinion
Student 5	Useful, because with textbooks I can find a lot of new vocabulary
Student 6	Very useful because, there can train my skills, train our ability to express all the ideas that arise in my mind
Student 7	In my opinion, um... there are benefits because by using printed media such as printed books we can more easily understand what the teacher conveys directly, while um... what is not very useful, in my opinion, if there is other media so that you don't feel bored
Student 8	It is very useful, because with this media or the package book it is easy for me to understand
Student 9	Useful, because if there is no textbook then there will be no material that the teacher can convey when teaching
Student 10	The media is very useful, because it helps us find new vocabulary and new material
Student 11	Yes, it's useful for me because if there's no textbook, there's no material or questions
Student 12	Yes, because the media is very helpful in terms of questions and answers
Student 13	Helpful, because it makes us more enthusiastic about learning English
Student 14	In my opinion it is very useful, because without such learning media it will be difficult to understand because there is no guide
Student 15	Useful, because with the help of the media it is quite easy to learn English.
