Lampiran 1 : Halaman *Login* Mahasiswa

The screenshot shows the login interface of the Digital Library. At the top, there is a dark blue header with the logo of the Faculty of Engineering (Fakultas Teknik UNHAS) and the text "DIGITAL LIBRARY FAKULTAS TEKNIK UNHAS". To the right of the header is a search bar with a magnifying glass icon and the text "Search...", a red "Search" button, and a user profile icon. The main content area is white and contains a login form. The form has two input fields: "Username" with the value "D121171306" and "Password" with masked characters "*****". Below the password field is a small note: "*use your NEOGA/APP5 account to login.". At the bottom of the form is a dark blue "Login" button. At the very bottom of the page, there is a dark blue footer with the text "Copyright © 2021 Digital Library Fakultas Teknik Unhas. All rights reserved."

Abstrak: Design of the intelligent interactive system for economic management computer simulation laboratory based on Python structured module is presented in the paper. The development language of the intelligent information operation and maintenance management platform chooses Python. The main reason for choosing the Python language is that it is simple, fast and flexible, commonly known as "blue language". The application of the Python scripting language to web crawler design has its unique advantages. Scripting is an automatic web crawler framework developed and packaged based on Python language, through which directional data crawling can be performed. Based on these technique Innovation, this paper gives the novel understanding of the intelligent interactive system for economic management computer simulation laboratory based on Python structured module. The simulation has proven the general performance.
