LAMPIRAN

Lampiran 1. Informed Consent

INFORMED CONSENT

Saya yang bertanda tangan dibawah ini, menyatakan bersedia menjadi sampel penelitian yang dilakukan oleh Nurul Ainun Hamka, mahasiswa Program Studi S1 Fisioterapi, Fakultas Keperawatan, Universitas Hasanuddin Makassar dengan dosen pembimbing :

1. Salki Sadmita, S.Ft., Physio, M.Kes
2. Adi Ahmad Gondo, S.Ft., Physio, Mkes

Saya telah mendapat keterangan secara rinci dan jelas mengenai :

- a. Penelitian yang berjudul “Hubungan *Craniovertebral Angle* dengan Keseimbangan Dinamis dan *Head Repositioning Accuracy* pada Mahasiswa S1 Fisioterapi Fakultas Keperawatan Universitas Hasanuddin”
- b. Perlakuan yang dilakukan pada subjek
- c. Prosedur penelitian
- d. Kerahasiaan informasi

Subjek penelitian mendapat kesempatan mengajukan pertanyaan mengenai segala sesuatu yang berhubungan dengan penelitian tersebut. Oleh karena itu, saya bersedia secara sukarela untuk menjadi sampel penelitian dengan penuh kesadaran serta tanpa keterpaksaan. Demikian pernyataan ini saya buat dengan sebenarnya tanpa tekanan dari pihak manapun.

Makassar, 2023

Lampiran 2. Kuesioner

Kuesioner

Saya Nurul Ainun Hamka mahasiswa Fisioterapi Universitas Hasanuddin bermaksud untuk melakukan pendataan awal pada mahasiswa Program Studi S1 Fisioterapi Fakultas Keperawatan Universitas Hasanuddin Makassar. Saya mengucapkan banyak terima kasih kepada pihak-pihak yang membantu dalam terselenggaranya penelitian ini. Data-data yang kami peroleh akan dijaga kerahasiannya dan hanya dipergunakan untuk keperluan penelitian.

Pertanyaan	Jawaban

 Hal. : Permohonan Izin Penelitian

Yth. Ketua Program Studi Fisioterapi Fakultas Keperawatan Unhas.
 MAKASSAR

Dengan hormat disampaikan bahwa dalam rangka penyelesaian studi Mahasiswa Program Studi Fisioterapi, Fakultas Keperawatan Universitas Hasanuddin, maka dengan ini kami mohon agar mahasiswa tersebut namanya di bawah ini :

Nama : Nurul Ainun Hamka
 NIM : R021191051
 Program Studi : Fisioterapi
 Rencana Judul : Hubungan Antara Craniovertebral Angle dengan Keseimbangan Dinamis dan Head Repositioning Accuracy pada Mahasiswa SI Fisioterapi Fakultas Keperawatan Unhas.

Dapat diberikan izin melakukan penelitian di Program Studi Fisioterapi Fakultas Keperawatan Unhas, yang akan dilaksanakan pada bulan Juli s.d Agustus 2023. Adapun Metode pengambilan sampel/data dengan : *Kuantitatif*

Besar harapan kami, agar permohonan izin ini dapat dipertimbangkan untuk diterima.
 Demikian permohonan kami, atas perhatiannya disampaikan terima kasih.

a.n. Dekan,
 Wakil Dekan Bidang Akademik dan
 Kemahasiswaan

SURAT - KETERANGAN

Nomor : 3206/UN4.18.8/PT.01.05/2023

Ketua Program Studi S1 Fisioterapi Fakultas Keperawatan Universitas Hasanuddin, menerangkan bahwa :

Nama	:	NURUL AINUN HAMKA
NIM	:	R021191051
Program Studi	:	S1 Fisioterapi
Fakultas	:	Keperawatan Universitas Hasanuddin

Benar telah melaksanakan penelitian pada Program Studi S1 Fisioterapi Fakultas Keperawatan Universitas Hasanuddin dengan Judul Skripsi “**Hubungan Antara Craniovertebral Angle Dengan Keseimbangan Dinamis Dan Head Repositioning Accuracy Pada Mahasiswi S1 Fisioterapi Fakultas Keperawatan Universitas Hasanuddin**” yang dilaksanakan terhitung mulai tanggal 7 Agustus – 11 September 2023.

Demikian Surat keterangan ini di berikan kepada yang bersangkutan untuk dipergunakan sebagaimana mestinya, dalam rangka proses penyelesaian studi pada Program Studi S1 Fisioterapi Fakultas Keperawatan Universitas Hasanuddin.

Dipindai dengan CamScanner

REKOMENDASI PERSETUJUAN ETIK

Nomor: 5168/UN4.14.1/TP.01.02/2023

Tanggal: 07 September 2023

Dengan ini Menyatakan bahwa Protokol dan Dokumen yang Berhubungan dengan Protokol berikut ini telah mendapatkan Persetujuan Etik:

No.Protokol	29823091278	No. Sponsor Protokol	
Peneliti Utama	Nurul Aisyah Hamka	Sponsor	Pribadi
Judul Peneliti	Hubungan Antara Craniovertebral Angle dengan Kesimbangan Dinamis dan Head Repositioning Accuracy pada Mahasiswa SI Fisioterapi Fakultas Keperawatan Universitas Hasanuddin		
No.Versi Protokol	1	Tanggal Versi	29 Agustus 2023
No.Versi PSP	1	Tanggal Versi	29 Agustus 2023
Tempat Penelitian	Fakultas Keperawatan Universitas Hasanuddin		
Judul Review	<input checked="" type="checkbox"/> Exempted <input type="checkbox"/> Expedited <input type="checkbox"/> Fullboard	Masa Berlaku 07 September 2023 Sampai 07 September 2024	Frekuensi review lanjutkan
Ketua Komisi Etik Penelitian	Nama : Prof.dr. Veni Hadju,M.Sc,Ph.D	Tanda tangan	 07 September 2023
Sekretaris komisi Etik Penelitian	Nama : Dr. Wahiduddin, SKM.,M.Kes	Tanda tangan	 07 September 2023

Kewajiban Peneliti Utama :

1. Menyerahkan Aransemen Protokol untuk persetujuan sebelum di implementasikan
2. Menyerahkan Laporan SAE ke Komisi Etik dalam 24 Jam dan dilengkapi dalam 7 hari dan Lapor SUSAR dalam 72 Jam setelah Peneliti Utama menerima laporan
3. Menyerahkan Laporan Kemajuan (progress report) setiap 6 bulan untuk penelitian resiko tinggi dan setiap setahun untuk penelitian resiko rendah
4. Menyerahkan laporan akhir setelah Penelitian berakhir
5. Melaporkan pernyimpangan dari protokol yang disetujui (protocol deviation/violation)
6. Mematuhi semua peraturan yang ditentukan

ABSTRAK

Craniovertebral Angle (CVA) merupakan pengukuran yang dilakukan untuk menilai postur kepala. CVA normal adalah $\geq 50^\circ$, semakin kecil craniovertebral angle akan membuat posisi kepala akan semakin maju ke depan. Mahasiswa yang menggunakan smartphone >4 jam/hari dengan posisi yang tidak ergonomis mengakibatkan terjadinya perubahan range of motion pada craniovertebral angle sehingga terjadi perubahan COG, LOG, dan BOS yang dapat mempengaruhi keseimbangan dinamis. Selain itu, perubahan range of motion pada craniovertebral angle juga menyebabkan pemanjangan otot deep neck extensor sehingga mekanisme kerja muscle spindle dan golgi tendon organ terganggu yang dapat mempengaruhi mekanisme sinyal aferen. Kondisi ini dapat menyebabkan proprioception terganggu yaitu berupa penurunan head repositioning accuracy. Tujuan penelitian ini untuk mengetahui hubungan antara craniovertebral angle dengan keseimbangan dinamis dan head repositioning accuracy pada mahasiswa SI Fisioterapi Fakultas Keperawatan Universitas Hasanuddin. Penelitian ini merupakan jenis penelitian korelasional dengan rancangan cross sectional menggunakan teknik purposive sampling sebanyak 154 orang mahasiswa. Pengumpulan data dilakukan dengan cara pengambilan data primer melalui instrumen pengukuran goniometer untuk mengukur craniovertebral angle, four square step test untuk mengukur keseimbangan dinamis, dan joint positioning error untuk head repositioning accuracy. Data yang diperoleh dari pengukuran craniovertebral angle dengan keseimbangan dinamis mendapatkan hasil Sig. (2-tailed) sebesar 0,013 ($<0,05$). Pada head repositioning accuracy didapatkan hasil Sig. (2-tailed) sebesar 0,000 ($<0,05$). Nilai correlation coefficient pada variabel craniovertebral angle dengan keseimbangan dinamis dan head repositioning accuracy bernilai negatif. Untuk distribusi didapatkan hasil craniovertebral angle, keseimbangan dinamis, dan head repositioning accuracy didominasi nilai tidak normal.

Kata kunci : Craniovertebral Angle, keseimbangan dinamis, head repositioning accuracy

ABSTRACT

Craniovertebral Angle (CVA) is a measurement taken to assess head posture. The normal CVA is $\geq 50^\circ$, the smaller the craniovertebral angle will make the head position more forward. Students who use smartphones >4 hours / day with non-ergonomic positions result in changes in the range of motion in the craniovertebral angle resulting in changes in COG, LOG, and BOS which can affect dynamic balance. In addition, changes in the range of motion in the craniovertebral angle also cause shortening of the deep neck extensor muscles so that the mechanism of muscle spindle and BOS can affect dynamic balance. In addition, changes in range of motion at the craniovertebral angle also cause shortening of the deep neck extensor muscle so that the working mechanism of the muscle spindle and golgi tendon organ is disrupted which can affect the afferent signal mechanism. This condition can cause impaired proprioception in the form of decreased head repositioning accuracy. The purpose of this study was to determine the relationship between craniovertebral angle with dynamic balance and head repositioning accuracy in undergraduate students of Physiotherapy Faculty of Nursing, Hasanuddin University. This study is a type of correlational research with a cross sectional design using purposive sampling technique as many as 154 students. Data collection is done by taking primary data through a goniometer measurement instrument to measure craniovertebral angle, four square step test to measure dynamic balance, and joint positioning error for head repositioning accuracy. Data obtained from measuring craniovertebral angle with dynamic balance get Sig. (2-tailed) of 0.013 (<0.05). In head repositioning accuracy, the result of Sig. (2-tailed) of 0.000 (<0.05). The correlation coefficient value on the craniovertebral angle variable with dynamic balance and head repositioning accuracy is negative. For distribution, the results of craniovertebral angle, dynamic balance, and head repositioning accuracy are dominated by abnormal values.

Keyword : Craniovertebral angle, dynamic balance, head repositioning accuracy
