NASKAH PENJELASAN UNTUK RESPONDEN

Selamat Pagi/ Siang/ Sore, ibu. Saya, dr. Andi Sri Ratnaningsih, yang akan melakukan penelitian tentang “Hubungan Antara Hepsidin dan Kadar Hemoglobin.Pada Kehamilan Dengan Obesitas”.

Obesitas pada kehamilan dapat menyebabkan Hepsidin berlebih yang akan menyebabkan menurunnya kadar hemoglobin. Oleh karena itu pada penelitian ini mengetahui tentang pengaruh Kadar Hepsidin dan Kadar Hemoglobin pada ibu hamil dengan obesitas.

Oleh karena itu, kami sangat mengharapkan ibu bersedia untuk ikut dalam penelitian ini secara sukarela dan mengizinkan kami menggunakan data ibu dalam laporan tertulis maupun laporan secara lisan. Bila ibu bersedia kami mengharapkan ibu memberikan persetujuan secara tertulis. Keikutsertaan ibu dalam penelitian ini bersifat sukarela tanpa paksaan, oleh karena itu ibu berhak untuk menolak atau mengundurkan diri tanpa risiko kehilangan hak untuk mendapatkan pelayanan kesehatan di rumah sakit ini.

Kalau ibu setuju untuk berpartisipasi, kami akan menanyakan beberapa hal antara lain data pribadi ibu dan riwayat kehamilan. Kami juga akan melakukan pengambilan sampel darah. Prosedur pemeriksaan kadar Hepsidin dan kadar hemoglobin dilakukan dengan menggunakan ELISA yang akan dianalisis di Laboratorium Penelitian RS Universitas Hasanuddin Makassar.

Kami menjamin keamanan dan kerahasiaan semua data pada penelitian ini. Data akan disimpan dengan baik dan aman, sehingga hanya bisa dilihat oleh yang berkepentingan saja. Demikian juga pada penyajian baik tertulis maupun pada laporan lisan, data pribadi ibu tetap akan kami rahasianakan. Data penelitian ini akan disajikan pada:

- Program Pendidikan Dokter Spesialis Obstetri dan Ginekologi Fakultas Kedokteran Universitas Hasanuddin (FK UNHAS) Makassar
- Publikasi pada majalah ilmiah dalam dan luar negeri

Bila ibu merasa masih ada hal yang belum jelas atau belum dimengerti dengan baik, maka ibu dapat menanyakan atau minta penjelasan pada saya: dr. Andi Sri Ratnaningsih (Telepon 081354295033).
