LEMBAR PENJELASAN PENELITIAN

Assalamualaikum Warahmatullahi Wabarakatuh.

Perkenalkan nama saya Nur Inayah Adam, NIM P102221036 merupakan mahasiswa Program Studi Magister Kebidanan Sekolah Pascasarjana Univiersitas Hasanuddin Makassar, sedang melakukan penelitian untuk tesis saya yang berjudul "Analisis Kadar Endotelin-1 pada Urin Ibu Hamil Non-obesitas dan Ibu Hamil Obesitas". Adapun tujuan dari penelitian saya ini yaitu ingin menganalisis kadar endotelin -1 pada Urin ibu hamil non-obesitas, ibu hamil obesitas prahamil dan ibu hamil obesitas *gestational weight gain (GWG)* dan menilai perbandingan antar ketiganya.

Penelitian ini dilakukan terlebih dahulu dengan membagikan lembar *informed consent* / lembar persetujuan bagi responden. Menjelaskan langkah penelitian, termasuk cara pengambilan sampel urin. Melakukan anamnesis dan pemeriksaan berat badan, tinggi badan,LILA dan tekanan darah. Saya selaku peneliti akan menjaga kerahasiaan identitas dan informasi yang akan diberikan oleh responden jika bersedia menjadi responden. Sehingga peneliti sangat berharap responden mau menjawab pertanyaan dengan jujur dan mau mengikuti intervensi yang dilakukan sampai penelitian ini selesai.

Apabila selama penelitian ini berlangsung, responden ingin mengundurkan diri dapat diberitahukan secara langsung kepada peneliti. Keikutsertaan responden didalam penelitian ini bersikap sukarela dan tidak adanya unsur paksaan dan diskriminasi dalam pemberian perlakuan pada responden. Demikian penjelasan ini saya sampaikan, atas kesediaan responden dalam penelitian ini disampaikan terima kasih.

Gorontalo,
Peneliti,

2024

Nur Inayah Adam

LEMBAR PERSETUJUAN MENJADI RESPONDEN
Analisis Kadar Endotelin-1 pada Urin Ibu Hamil Non-obesitas dan Ibu Hamil Obesitas

PERNYATAAN RESPONDEN

Saya yang bertanda tangan dibawah ini :

No. Responden : _____

Umur : _____

Alamat : _____

No. Hp : _____

Setelah mendengar/membaca dan mengerti penjelasan tentang maksud, tujuan, manfaat dan efek yang ditimbulkan penelitian ini, maka dengan ini saya menyatakan bersedia untuk berpartisipasi sebagai responden dalam penelitian yang dilakukan oleh Saudari Nur Inayah Adam Mahasiswa Program Studi Magister Kebidanan Sekolah Pascasarjana Universitas Hasanuddin Makassar dengan judul "**Analisis Kadar Endotelin-1 pada Urin Ibu Hamil Non-obesitas dan Ibu Hamil Obesitas**".

Maka saya setuju untuk diikutsertakan dalam penelitian ini dan bersedia berpartisipasi dengan mematuhi ketentuan yang berlaku dalam penelitian ini, apabila dalam penelitian ini saya merasa dirugikan, saya berhak membatalkan persetujuan ini. Demikian pernyataan ini saya buat dengan penuh kesadaran untuk digunakan sebagaimana mestinya.

Gorontalo, 2024

Responden,

Saksi,

Lampiran 3**ANALISIS KADAR ENDOTELIN-1 PADA URIN IBU HAMIL NON-OBESITAS DAN IBU HAMIL OBESITAS****I. IDENTIFIKASI KARAKTERISTIK RESPONDEN**

- 1 Nomor Responden (A/B/C) :
 2 Tanggal Pengkajian :
 3 Nama Ibu
 Nama Suami :
 Pendidikan Ibu
 4 1. SD-SMA :
 2. Diploma/S1/S2/S3
 Pekerjaan Ibu :
 5 1. Bekerja :
 2. IRT
 Pekerjaan Suami
 6 Alamat :
 7 No. Hp Ibu/WA
 No. Hp Suami :
 Pendapatan Per Bulan (Ibu dan Suami):
 8 1. < Rp. 2.989.350,- :
 2. ≥ Rp. 2.989.350,- :

II. IDENTIFIKASI RIWAYAT KESEHATAN

- 1 Berat Badan Sebelum Hamil : kg
 2 Berat Badan Sekarang : kg
 Jumlah Kenaikan Berat Badan Ibu : kg
 3 1. Sesuai
 2. Tidak Sesuai :
 4 Tinggi Badan : cm / m²
 5 Lingkar Lengan : cm
 6 Indeks Massa Tubuh (IMT): 1. Sebelum Hamil / 2. Sekarang : kg/m² / kg/m²
 7 Status Obstetri (GPA) : G P A
 8 Umur Kehamilan :
 :

- 9 Tekanan Darah : / mmHg
- 10 Proteinuria :
- 11 Apakah punya keturunan obesitas :
1. Ya
2. Tidak

Keterangan Kode :

- A : Responden untuk ibu hamil Non-obesitas
- B : Responden untuk ibu hamil Obesitas Pra-hamil
- C : Responden untuk ibu hamil Obesitas *Gestational Weight Gain* (GWG)

Tabel Sintesa Penelitian

Tabel 6. Sintesa Penelitian

No	Judul dan Penulis	Metode	Hasil
1	<i>Perbedaan Kadar Endotelin-1 Plasma pada Penderita Preeklampsia dengan Kehamilan Normotensif</i> (Hartati et al., 2015)	D : Observasional desain cross sectional comparative S : 16 orang ibu hamil preeklampsia dan 16 orang ibu hamil normotensif V : Menilai Kadar Endotelin-1 Plasma pada ibu hamil Preeklampsia dan Normotensif A : <i>independent t test</i>	Terdapat perbedaan signifikan Dimana kadar endotelin-1 pada ibu hamil preeklampsia lebih tinggi dari ibu hamil normotensif
2	<i>Analisis Kadar Endothelin-1 Urin Pada Remaja Akhir Obesitas</i> (Utami et al., 2022)	D : Analitik dengan pendekatan kuantitatif variable numerik S : 26 orang remaja usia 18-20 tahun yang obesitas dan 26 orang remaja usia 18-20 tahun yang normal V : Menganalisis perbedaan kadar endotelin-1 urin pada kelompok remaja obesitas dan normal A : <i>independent t test</i>	Terdapat perbedaan kadar endothelin-1 urin pada remaja obesitas dan normal dimana kelompok remaja obesitas kadarnya lebih tinggi dari remaja normal.
3	<i>Perbandingan Kadar Endotelin-1 sebagai Indikator Disfungsi Vaskuler pada Tikus Wistar Obes dan Non Obes</i> (Syarifuddin; et al., 2017)	D : Observasional dengan desain case control S : 165 orang V : Tikus wistar dewasa obesitas, normal dan kadar Endotelin-1 I : Kadar endotelin darah dan ELISA A: Independen T-sampel.	Terdapat perbedaan signifikan kadar ET-1 pada tikus obes dengan tikus non obes.
4	<i>Perbandingan Kadar Endotelin-1 pada Tikus</i>	D : Eksperimental dengan	Tidak terdapat

No	Judul dan Penulis	Metode	Hasil
	<i>Wistar Obes dan Non Obes Hamil</i> (Hukom et al., 2019)	<p>desain post test only control design.</p> <p>S : 11 tikus wistar betina dewasa</p> <p>V : Tikus obesitas dan non obes yang hamil, kadar endotelin-1</p> <p>I : Membuat tikus wistar obes dan hamil terus diperiksa dengan menggunakan ELISA Kit pada kadar endotelin-1 darah</p> <p>A : <i>independent t test</i></p>	perbedaan yang bermakna antara tikus wistar hamil obes dengan hamil non obes.
5	<i>Korelasi Positif Antara Kadar Endotelin-1 dan Skor Roll Over Test pada Preeklampsia</i> (Simanjuntak, 2020)	<p>D : Analitik kuantitatif dengan desain cross sectional.</p> <p>S : 100 orang ibu hamil normotensi dan 50 orang ibu hamil preeklampsia</p> <p>V : ibu hamil normotensi, ibu hamil preeklampsia dan kadar endotelin-1, serta roll over test.</p> <p>I : Pengukuran tekanan darah, pemeriksaan kadar ET-1 darah menggunakan ELISA Kit</p> <p>A : Uji Chi Square, T-test independent dan uji korelasi bivariat</p>	Terdapat korelasi positif antara kadar ET-1 dan skor ROT pada preeklampsia
6	<i>Gambaran Genotype Endotelin-1 G5665T pada Ibu Hamil Riwayat Preeklampsia</i> (Rahayu, 2019)	<p>D: Kuantitatif observasional.</p> <p>S : 30 Ibu Hamil</p> <p>V : Riwayat Preeklampsia, Tekanan Darah, dan Genotipe endotelin-1 G5665T</p> <p>I : Pemeriksaan darah, dan pemeriksaan menggunakan ELISA Kit dan PCR Kit</p> <p>A : Chi Square</p>	Tidak terdapat hubungan antara genotype endotelin-1 G5665T dan tekanan darah pada ibu hamil Riwayat preeklampsia.

Lampiran 5**Tahap Pemeriksaan Spesimen Urin****A. Pra Analitik****1. Persiapan Pasien**

Persiapan pasien secara umum:

- a. urin sewaktu dengan pancaran tengah (mid stream urine)
- b. volume urin minimal 30 ml
- c. penghentian minum obat dan vitamin perlu diperhatikan obat yang dapat mempengaruhi pemeriksaan sebaiknya dihentikan sebelum pengambilan urin selama 10 jam. Contoh : pemberian vitamin C dapat mempengaruhi analisis kimia urin, pemberian diuretik dan caffeine dapat menyebabkan pengenceran urin

2. Pengambilan Spesimen

a. Wadah spesimen harus memenuhi syarat:

- 1) terbuat dari gelas atau plastik
- 2) tidak bocor atau tidak merembes
- 3) harus dapat ditutup rapat
- 4) gampang dibuka
- 5) besar wadah disesuaikan dengan volume spesimen
- 6) bersih
- 7) kering
- 8) tidak mengandung bahan kimia atau deterjen
- 9) untuk pemeriksaan biakan dan uji kepekaan kuman, wadah harus steril

b. Volume spesimen yang diambil harus sesuai dengan perbandingan antikoagulan yang ada dan mencukupi kebutuhan pemeriksaan laboratorium yang diminta

c. Pengambilan spesimen harus disesuaikan dengan jenis pemeriksaan dan dilaksanakan dengan cara yang benar mengacu pada penyelenggaraan laboratorium yang benar. Untuk urin digunakan urin mid stream urin yaitu urin porsi tengah yang dilakukan sendiri oleh pasien dengan cara :

- 1) Biarkan urin keluar selama beberapa detik, kemudian tampung urin hingga setengah sampai dua pertiga wadah.
 - 2) Pengumpulan urin selesai sebelum aliran urin habis.
 - 3) Hindari urin mengenai lapisan tepi wadah
 - 4) Wadah ditutup rapat dan segera diberikan ke petugas.
3. Pengolahan Spesimen
 - a. untuk uji carik celup, pemeriksaan harus segera dilakukan dalam waktu kurang dari 1 jam setelah penampungan
 - b. untuk pemeriksaan sedimen, 10 ml urin disentrifus terlebih dahulu dengan kecepatan 400–500 g selama 5 menit.
 - c. untuk pemeriksaan biakan dan uji kepekaan, urin harus segera diperiksa
 - d. untuk pemeriksaan menggunakan ELISA tes, urin disimpan dalam coolbox yang berisi ice gel sebelum disimpan di freezer -80°C.
- B. Analitik
1. Untuk pemeriksaan Protein Urin menggunakan Stik celup yang dilakukan dalam waktu kurang dari 1 jam.
 2. Untuk pemeriksaan ELISA dilakukan melalui tahapan pemeriksaan ELISA Endotelin-1 yang ringkasannya sebagai berikut :
 - a. Siapkan semua Reagent, sampel, dan standar.
 - b. Tambahkan sampel dan reagen ELISA ke dalam piring dengan baik. Inkubasi selama 1 jam pada suhu 37°C.
 - c. Cuci piring ELISA sebanyak 5 kali.
 - d. Tambahkan larutan subtract A dan B, inkubasi selama 10 menit pada suhu 37°C.
 - e. Tambahkan Stop solution dan colour development.
 - f. Baca nilai OD dalam waktu 10 menit.
- C. Pasca Analitik
1. Verifikasi Hasil
 2. Validasi Hasil
 3. Penulisan Hasil Pemeriksaan

REKOMENDASI PERSETUJUAN ETIK

Nomor: 145/UN4.14.I/TP.01.02/2024

Tanggal: 15 Januari 2024

Dengan ini Menyatakan bahwa Protokol dan Dokumen yang Berhubungan dengan Protokol berikut ini telah mendapatkan Persetujuan Etik:

No. Protokol	9124092006	No. Sponsor Protokol	
Peneliti Utama	Nur Inayah Adam	Sponsor	Pribadi
Judul Peneliti	Analisis Kadar Endotelin-1 (ET-1) pada Urin Ibu Hamil Non Obesitas dan Ibu Hamil Obesitas		
No.Versi Protokol	1	Tanggal Versi	9 Januari 2024
No. Versi PSP	1	Tanggal Versi	9 Januari 2024
Tempat Penelitian	Wilayah Kerja Dinas Kesehatan Kota Gorontalo		
Judul Review	<input type="checkbox"/> Exempted <input checked="" type="checkbox"/> Expedited <input type="checkbox"/> Fullboard	Masa Berlaku 15 Januari 2024 sampai 15 Januari 2025	Frekuensi review lanjutan
Ketua Komisi Etik Penelitian	Nama: Prof.dr. Veni Hadju,M.Sc,Ph.D	Tanda tangan 	Gorontalo 15 Januari 2024
Sekretaris komisi Etik Penelitian	Nama: Dr. Wahiduddin, SKM.,M.Kes	Tanda tangan 	Gorontalo 15 Januari 2024

Kewajiban Peneliti Utama :

1. Menyerahkan Amandemen Protokol untuk persetujuan sebelum di implementasikan
2. Menyerahkan Laporan SAE ke Komisi Etik dalam 24 Jam dan dilengkapi dalam 7 hari dan Lapor SUSAR dalam 72 Jam setelah Peneliti Utama menerima laporan
3. Menyerahkan Laporan Kemajuan (progress report) setiap 6 bulan untuk penelitian resiko tinggi dan setiap setahun untuk penelitian resiko rendah
4. Menyerahkan laporan akhir setelah Penelitian berakhir
5. Melaporkan penyimpangan dari protokol yang disetujui (protocol deviation/violation)
6. Mematuhi semua peraturan yang ditentukan

: Nur Inayah Adam

NIM

: P102221036

Institusi

: Prodi S2 Ilmu Kebidanan Sekolah Pascasarjana UNHAS

Akan melakukan pengambilan data/ analisa bahan hayati :

Pada tanggal : 3 Januari 2024 s/d Selesai

Jumlah subjek : ± 75 sampel

Jenis data : Data Primer

Untuk penelitian dengan judul :

"Analisis Kadar Endotelin-1 (ET-1) pada Urin Ibu Hamil Non Obesitas dan Ibu Hamil Obesitas"

Harap dilakukan pembimbingan dan pendampingan seperlunya. Terima Kasih.

Staf Administrasi,

Catatan : Proses pengirian dilakukan oleh peneliti, Pendamping hanya mendampingi.

Jika pengambilan data telah selesai, di wajibkan bagi pendamping/pembimbing:

1. Membutuhkan paraf dan tanggal selesaikan pengambilan data di formulir ini,
2. Mengisi jumlah alat dan bahan habis pakai yang digunakan peneliti pada form tarif penggunaan alat dan bahan,
3. Mengembalikan formulir yang sudah lengkap ke staf administrasi.

Nomor : 02668/UN4.20.1/PT.01.04/2024

Hal : Permohonan Izin Membawa Sampel untuk Penelitian

27 Maret 2024

Yth. Kepala Laboratorium RSPTN
 Universitas Hasanuddin
 Makassar

Dengan hormat disampaikan bahwa mahasiswa Sekolah Pascasarjana Universitas Hasanuddin yang tersebut dibawah ini :

Nama : Nur Inayah Adam

Nomor Pokok : P102221036

Program Pendidikan : Magister (S2)

Program Studi : Ilmu Kebidanan

Bermaksud melakukan penelitian dalam rangka persiapan penulisan tesis terkait dengan judul "Analisis Kadar Endotelin-1 ET-1 pada Urin Ibu Hamil Non-Obesitas dan Ibu Hamil Obesitas".

Sehubungan dengan hal tersebut, mohon kiranya yang bersangkutan diberikan izin untuk membawa sampel untuk penelitian di Laboratorium
 Adapun sampel tersebut berupa :

1. Urine bekas dalam pot tumpang 50 ml, yang telah disimpan dalam kulkas freezer dengan suhu -29°C s/d -32°C, lebih dari 2x24 jam yang juga diberi beberapa ice gel agar urine tetap bekas dalam waktu 3-5 jam diluar freezer dan dipacking rapat serta rapi pada box stereofoum.
2. Spesifikasi : bekas, tidak berbau, tidak memicu api/kebakaran, tidak menimbulkan ledakan, dan tidak memiliki nilai ekonomis.

Atas perkenan dan kerjasamanya disampaikan terima kasih.

an. Dekan,
 Wakil Dekan Bidang Akademik dan
 Kemahasiswaan

Prof. Baharuddin Hamzah, ST., M.Arch., Ph.D.
 NIP. 196903081995121001

Tembusan:

1. Dekan SPs. Unhas "sebagai laporan";
2. Mahasiswa yang bersangkutan;
3. Pertinggal.
