3. Tampilan Prediksi Sistem

The screenshot shows a web application window titled "prediksi". The main interface is divided into a sidebar and a main content area. The sidebar, labeled "Prediksi", contains input fields for "Tanggal" (01-Jan-2020), "Hari" (Rabu), and "Waktu" (10:30:00). Below these are buttons for "Load Data" (with a dropdown menu showing "BDR/2"), "Load Jaringan" (with a dropdown menu showing "Pilih Tanggal"), "Prediksi", and "Reset". The main content area features a table with the following data:

	LT	Tahun	Bulan	Tanggal	Hari	Waktu	Jumlah Penumpang (predicted)
1	BDR/2	2020	Januari	1	Rabu	10:30:00	71

A "UICalendar" dialog box is overlaid on the main content area, showing a calendar for January 2021. The date 24 is highlighted in yellow. The dialog box includes "Clear all", "OK", and "Cancel" buttons.
