Models

Default model (Default model)

Notes for Model (Default model)

Computation of degrees of freedom (Default model)

Number of distinct sample moments: 55

Number of distinct parameters to be estimated: 47

Degrees of freedom (55 - 47): 8

Result (Default model)

Minimum was achieved

Chi-square = 13.70249

Degrees of freedom = 8

Probability level = .08986

Group number 1 (Group number 1 - Default model)
